10- General Information About the Common Working File (CWF) System

(Rev. 1, 10-01-03)

A3-3800, B3-6000

The Common Working File (CWF) is comprised of nine localized databases called Hosts. Hosts maintain total beneficiary claim history and entitlement information for the beneficiaries in their jurisdiction. Each jurisdiction is a network of intermediaries and carriers (Satellites) located in a defined geographic area (sector). Each Satellite within the sector is linked to its Host via telecommunications. The Satellites transmit daily files with claims ready for payment to the Host. The Host returns approvals, rejects, or adjustments and informational trailers daily.

Each beneficiary is assigned to only one Host site. Beneficiaries are assigned to a Host site based on where the beneficiary signs up for their Social Security Administration (SSA) benefits. For example, if a beneficiary signs up for their SSA benefits in Dallas, Texas, the Southwest Host will get the beneficiary. The information the Host site maintains for its beneficiaries is called a CWF Master Record. This record contains complete entitlement, utilization, history, Medicare Secondary Payer (MSP), and Health Maintenance Organization (HMO) data. All Part A and B claims for a beneficiary are processed against this single file prior to claims payment. The record is updated daily with data from adjusted and approved claims.

When a Satellite receives a claim, it processes the claim to the point of payment or denial, using data from its own files and the data on the claim. Prior to payment, the claim is transmitted to the Host site. The Host uses the CWF files to determine the beneficiary's most recent utilization and entitlement status and uses that information to decide whether the claim should be approved for payment. The Host determines whether to accept the claim as submitted, accept the claim with adjustments, or reject the claim for corrective action by the Satellite.

Each Host site is responsible for processing those claims submitted for beneficiaries on its database. These claims are processed through a shared software system supplied to each Host by the CWF Maintenance Contractor (CWFM). Each change made to the CWF software is released to all Host sites in a uniform manner. This software performs consistency and utilization editing on claims for corrective action by the Satellite.

20 - Communication Between Host and Satellite Sites

(Rev. 1, 10-01-03)

A3-3800, B3-6001, B3-6003

The local CWF database for each sector resides at a Host. Each Satellite within the sector is linked to its Host's database. Communication between them is electronic, with

claims ready for payment or denial communicated to the Host, and adjustments, approvals, rejects, and informational trailers returned from the Host via a daily process. The Satellite usually initiates this process. On occasion, the CWF Host will initiate an "unsolicited response" to the Satellite as a result of a new claims action that affects a previously processed claim action.

Each file the Satellite transmits is preceded by a header record and followed by a trailer record. These records indicate the beginning and end of each file. Complete documentation including record formats, can be reviewed and downloaded at the <http://cms.csc.com/cwf>.

Claims are processed by CWF in the same order that they are received, regardless of the dates on which expenses were incurred. This first-in-first-out method of processing requests for payment facilitates prompt handling of claims.

20.1 - Records the Satellites Transmit to Their Host

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004

20.1.1 - Medicare Secondary Payer (MSP) Maintenance Transaction Record/Fiscal Intermediary (FI) and Carrier MSP Auxiliary File Update Responsibility

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.2, AB-00-74, AB-02-107

See [Chapter 6](#) of the MSP Manual.

20.1.2 - Claim Records

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.1

The CWF Claim Record is a record of a claim that the Satellite has processed and is ready for payment or denial. It is submitted in daily files to the Host for approval. The Host clears the claim record through regular CWF consistency edits, MSP consistency edits, regular CWF utilization edits and then MSP utilization edits, in that order, and makes its approval, adjustment or rejection determination. The final determination is returned on a Basic Reply Record. (See [§20.2.1](#).) Claim records can be of the following types:

Part B (Carrier) Claim Record

Carrier bills are input on the HUBC record. Refer to CWF Systems Documentation (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), Record Name: CWF Part B Claim, for the complete record layout and field descriptions.

DMEPOS Claim Record: DMEPOS bills are input on the HUDC record. Refer to CWF Systems Documentation (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), Record Name: CWF Part B and DMEPOS Claim, for the complete record layout and field descriptions.

Inpatient/Skilled Nursing Facility Claim Record: Inpatient hospital and SNF bills are input on the HUIP record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Outpatient Claim Record: Outpatient bills are input on the HUOP record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Home Health Claim Record: Home health bills are input on the HUUH record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Hospice Claim Record: Hospice bills on the HUHC record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

20.1.3 - Hospice Notice of Election

(Rev. 1, 10-01-03)

A3-3800.1

Hospice Notices of Election are input on the HUHC record (Type of Bill 81A, 81B, 81C, 81D, 82A, 82B, 82C, or 82D). See <http://cms.csc.com/cwf> for the record format. Regional Home Health Intermediaries (RHHIs) use the HUHC record described in <http://cms.csc.com/cwf> for subsequent hospice bills.

20.1.4 - Adjustments to Posted Claims

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.3

Two actions can be taken on a claim that is already posted to CWF history. These actions are the same whether submitted by a carrier or an FI; however, the codes used are different:

- **Void** - Use a void to cancel original data on the beneficiary database and totally remove the dollar amounts. To void a posted claim, send the claim with the

original document control number and a "Full Credit" code (Entry Code 3 for carriers and Action Code 4 for FIs).

- **Change** - Send a full claim with a "Replacement Debit" code (Entry Code 5 for carriers and Action Code 3 for FIs) and the original document control number to make a change to a posted claim. This code is used to change most claims information. The old claim information will be backed out and replaced with the new claim information. The CWF will keep a record of the old claim so that any investigation of the actions taken on the claim will include the fact that there was a replacement action taken.

20.1.5 - Form CMS-382, ESRD Beneficiary Selection

(Rev. 1, 10-01-03)

A3-3644.4

Each Medicare home dialysis beneficiary chooses the method by which Medicare pays for his/her dialysis services. To do this, the beneficiary completes the Beneficiary selection Form CMS-382 and the facility forwards the form to its intermediary. See Chapter 8, §70.1 for information about the ESRD Method Selection process.

20.2 - Records the Host Transmits to its Satellites

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005

20.2.1- Basic Reply Record

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005.1

When the Host receives each claim or adjustment, it searches the Beneficiary File to find the Beneficiary Record. If the Beneficiary Record is found, the record is processed and a reply record is transmitted to the Satellite. See [§20.2.2](#), for an explanation of the procedure if the Beneficiary Record is not found ("Not in File.") The record type returned by CWF is dictated by the claim record type as follows:

- **Part B/Carrier Basic Reply Record** - Reply record for each CWF Part B/carrier bill (HUBC) processed. Refer to CWF Systems Documentation, Record Name: CWF Part B Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **DMEPOS Basic Reply Record** - Reply record for each CWF DMEPOS bill (HUDC) processed. Refer to CWF Systems Documentation, Record Name: CWF

DMEPOS Claim Response Record

(<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.

- **Inpatient/SNF Bill Basic Reply Record** - Reply record for each Inpatient/SNF bill (HUIP) processed. Refer to CWF Systems Documentation, Record Name: CWF Inpatient/SNF Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **Outpatient/Home Health/Inpatient Part B Bill Basic Reply Record** - Reply record for each Outpatient/Home Health/Inpatient Part B bill (HUOP and HUUH) processed. Refer to CWF Systems Documentation, Record Name: CWF Outpatient/Home Health/Inpatient Part B Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **NOE/Hospice Bill Basic Reply Record** - Reply record for each Hospice Notice of Election and all subsequent Hospice bills (HUHC) processed. Refer to CWF Systems Documentation, Record Name: CWF NOE/Hospice Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.

Each reply record will contain a disposition code in field 11 that indicates the action taken on the bill by the Host and what action the Satellite should take next.

The following is a list of actions that CWF may take on a claim record. Disposition codes, cross-reference/alpha search/NIF situations, their associated trailers, and bill recycling instructions are also included:

20.2.1.1 - Accepted (as is) for Payment

(Rev. 1, 10-01-03)

The claim record is posted to CWF history as submitted to the Host. The Satellite pays the claim accordingly.

- Disposition code 01.
- **Basic Reply Trailers** - These are informational trailers that contain entitlement, utilization, MSP, or other information, as appropriate, and are returned with the Reply. They give the Satellite the most recent information available about the beneficiary's claim history and other important data. Satellites must use this information to update their own data to improve the accuracy of future claims processing.

- **Return Alerts** - These are sent to the Satellite when CWF believes that there is a potential problem or error in the claim. The presence of an alert indicates that the Satellite should examine the information and make adjustments if necessary.

20.2.1.2 - Adjusted and Then Accepted for Payment

(Rev. 1, 10-01-03)

The deductible and/or payment limitations field(s) on the claim record were in error and CWF recalculated the field(s). The Host posts the record to CWF after these corrections are made. The Satellite must make the same adjustments to its files using information from basic reply Trailers 07 and 11 and pay the claim accordingly. Satellites must not resubmit the claim to CWF.

- Disposition code 02
- Basic Reply Trailers (07 and 11)
- A/B Crossover Alerts

20.2.1.3 - Cancel/Void Claim Accepted

(Rev. 1, 10-01-03)

This action cancels or voids a previously processed claim posted to CWF History. All utilization and deductibles associated with the claim are backed out. The Satellite receives a disposition code informing it that the cancel/void action was accepted.

- Disposition code 03
- Basic Reply Trailers

20.2.1.4 - Rejected

(Rev. 1, 10-01-03)

The claim record contains errors that prevent CWF from posting the claim to history. The claim is returned to the Satellite with codes explaining the errors. The Satellite must correct the CWF Claim Record and resubmit it.

- **Disposition Code ER, UR, CR, or RT, as Appropriate** - There will never be a combination of ER, UR, CR, and RT error codes on the same reply.
- **Consistency Error Codes (ER)** - Consistency edits examine the information on the claim itself. The consistency error codes indicate the errors in consistency found on the claim. These codes are returned on Basic Reply Trailer 08 and can contain up to four consistency error codes. Refer to CWF Systems

Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>, for a detailed description of these error codes.

- **Utilization Error Codes (UR)** - Utilization edits compare the information on the CWF Claim Record with the information found on the CWF Beneficiary Master Record. The utilization error codes indicate discrepancies between the CWF Claim Record and the CWF Beneficiary Master Record. Since the CWF Beneficiary Master Record is presumed to be correct, these codes inform the Satellite what corrections it must make. The code is returned on basic reply Trailer 08 and contains only one utilization error code. Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>, for a detailed description of these error codes.
- **A/B Crossover Edits (CR)** - When the Host receives a Part A bill, CWF automatically checks the information in the record against the beneficiary's history files for both Part A and Part B utilization. If there is a conflict (or "crossover") of services, CWF will generate an A/B Crossover error code. These are returned on the reply Trailer 13 and will contain only one A/B crossover error code. Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/desc1v3b.pdf>, for a description of these error codes.

Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>, for detailed descriptions and resolutions of these error codes.

20.2.2 - Not in Host's File (NIF)

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005.2

When the Host receives a claim record from a Satellite, it first searches its beneficiary and cross reference files. If it does not find the beneficiary's record in either place, it searches the Transfer Not in File (TNIF) file. If the record is not found there, the Host puts a response on the reply record in the form of a disposition code 50 or 52, indicating that the Beneficiary Record for which the Satellite submitted a claim record is not located at the Satellite's Host.

The TNIF file contains a record of every beneficiary for whom the Host has received a claim, and whose records are located at another Host. It shows at which Host the beneficiary file resides. If the Beneficiary Record is located at another Host, the original Host checks the out-of-service area response file to see if the claim record response is already waiting there. If there is not a response waiting, the claim is sent to the proper Host for processing. If there is a response, the Host gives that information to the Satellite.

There are many disposition codes that are returned to the Satellite for various NIF situations. Following is a list of codes and actions the Satellite takes in response to each disposition code.

20.2.2.1 - Disposition Code 50 (Not in File)

(Rev. 1, 10-01-03)

Disposition code 50 can come with any of the following seven error codes:

1. With Error Code 5052 - Beneficiary Identification Incorrect - The name and/or claim number shown on the bill is incorrect or claim number is not in file. If the TNIF file does not indicate another Host, the beneficiary's records may not have been assigned to a Host and are still resident at CMS or they were assigned to another Host site and the TNIF File was not updated. When the Host is not sure which is the case, it gives disposition code 50 and Trailer 08 with error code 5052 on the reply to the Satellite. Carriers and FIs verify through inquiry to the Host that the HICN is correct on the bill. If the bill is correct, and the Host HIMR agrees with the reject (no record), carriers and FIs must notify the Host of the error. The Host will contact CMS to determine eligibility.

2. With Error Code 5054 - The Host returns code 50 with Trailer 08 and error code 5054 when an auxiliary indicator is present on the CWF Beneficiary Master Record, but no auxiliary record is found.

- Concurrent with this response to the Satellite, the Host sends a request for transfer to CMS requesting the beneficiary's records from CMS' Master File.
- The carrier or FI must recycle the claim every four working days until an approval, adjustment or reject (AAR) response is received, or 45 working days have passed since receipt of the original code 50.
- The carrier or FI reports through locally established procedures to the Host if 45 days pass with no AR response.

3. With Error Code 5055 - The Host returns code 50 with Trailer 08 and error code 5055 (Beneficiary Blocked at CWF Host and CMS Batch Pending Clerical Update) if CMS must investigate a beneficiary's entitlement because of suspicion of fraud or abuse. The Satellite recycles the claim every 15 working days until otherwise notified.

Definition of Day One for CWF Satellite Recycle - Day one is the day that the Satellite receives the disposition code back from the Host. For example, a Satellite sends the update file to the Host on Monday, April 1, at 10 p.m. The Satellite receives the response file from its Host site at 9 a.m. Tuesday, April 2. Tuesday, April 2, is day one for Satellite recycle.

4. With Error Code 5056 - The Host returns code 50 with Trailer 08 and error code 5056 (Skeleton - No Beneficiary Record on HI Master File) when the HICN involved is for a beneficiary whose date of death is prior to 1975.

- The records for these beneficiaries have been purged from the file.
- Carriers and FIs research the HICN and confirm that the HICN submitted on the claim is correct. If incorrect, it resubmits the claim with the correct HICN.
- If the originally submitted HICN was correct, carriers or FIs refer the case to the RO.

5. With Error Code 5057 - The Host returns disposition code 50 with Trailer 08 and error code 5057 (Skeleton on HI Master File). This indicates that the beneficiary has died.

- There has been no claims activity for six months since date of death, and the beneficiary information is located on the inactive file.
- Carriers and FIs research the HICN and confirm that the HICN submitted on the claim is correct. If incorrect, resubmit the claim with the correct HICN.
- If the originally submitted HICN was correct, the carrier or FI recycles the claim every 15 working days to allow CMS time to retrieve the records.
- After 45 working days have passed with no approval, adjustment, or reject (AAR) response, Satellites contact their RO.

6. With Error Code 5058 - The Host returns disposition code 50 with Trailer 08 and error code 5058 (Blocked). The records have been blocked due to cross-reference activity. There are two numbers for one beneficiary, both of which show claims activity. The information is manually placed under one primary number in one record.

- Satellites recycle the claim every 15 working days to allow time for CMS processing.
- After receiving a second code 58, they contact the RO.

7. With Error Code 5059 - The Host returns this as disposition code 50 and Trailer 08 with error code 5059 (Frozen). Miscellaneous clerical corrections are being made to these beneficiary records.

- Satellites recycle the claim every 15 working days.
- After receiving a second code 59, they contact the RO.

20.2.2.2 - Disposition Code 51 (True Not in File on CMS Batch System)

(Rev. 1, 10-01-03)

The Host gives this response with a 08 Trailer and error code 5052. The CMS has performed an alpha search of its records and cannot locate the beneficiary's records. Alpha search is the process of searching for the records based on the first six positions of the surname. All beneficiaries with the same first six letters in their surnames are listed with their HICNs. The system checks for possible matches, including the possibility that numbers were transposed. This search is performed only if no match is found during the search by HICN.

This code can be given in two forms:

1. With Trailer 01 - Trailer 01 will contain a possible corrected HICN. The carrier or FI investigates the possible HICN and, if it believes the new HICN is for the same beneficiary, it resubmits the claim with the new HICN to the Host. The CWF will respond with the appropriate disposition code and any associated trailers for processing the claim.

2. Without Trailer 01 - This response indicates that after performing the alpha search operation, no match is found against the HICN submitted and CMS records. Since Medicare eligibility cannot be established, the carrier or FI must deny the claim using the following messages:

MSN 5.2 - "The name or Medicare number was incorrect or missing. Please check your Medicare card. If the information on this notice is different from your card, contact your provider."

Adjustment Reason Code 16 - "Claim/service lacks information which is needed for adjudication." Additional information is supplied using remittance advice remarks codes whenever appropriate.

Remittance Advice Remark Code MA27 - "Missing/incomplete/invalid entitlement number or name shown on the claim."

20.2.2.3 - Disposition Code 52 (Beneficiary Record at Another Host)

(Rev. 1, 10-01-03)

- When CMS receives a request for transfer, it searches its Master File to determine if the Beneficiary Record resides at another Host.
- The CMS first searches the record based on the HICN. If a match is found, and the beneficiary has not already been assigned to a Host, CMS sends the records to the requesting Host. After the Host receives the record, it can process the claim from the Satellite on its next cycle.

- If a match is found that indicates the beneficiary has been assigned to another Host, CMS sends the requesting Host a code 52. The requesting Host then sends the claim information to the receiving Host that has the Beneficiary Record.
- The requesting Host will give the processing Satellite a code 52 and Trailer 08 with a 5052 error code.
- The Satellite holds the claim and resends (recycles) it in five working days to see if there is a response waiting.
- If the response is present on the first recycle of the claim, the Satellite finishes processing the claim according to the response.
- If a response is not present, the Satellite receives another disposition code 52 and the claim is sent to the proper Host for processing.
- The Satellite recycles the claim after another five working days, and continues recycling the claim until it receives an approval, adjustment, or reject (AAR) response, or until 45 working days have passed.
- After 45 working days have passed with no AAR response, the Satellite reports the problem to the Host through locally established reporting procedures.

20.2.2.4 - Disposition Code 53 (Record in CMS Alpha Match)

(Rev. 1, 10-01-03)

- If CMS sends a claim to alpha search, it must send a disposition code 53 to the Host. The Host puts a code 53 on its TNIF file.
- The Satellite receives code 53 and Trailer 08 with a 5052 error code on the next recycle of the claim.
- The Satellite must recycle the claim 15 working days after receiving this code.
- If an AAR response is not received after the receipt of the third code 53 for the same claim, the Satellite must deny the claim using the following messages:

MSN message 5.1: "Our records show that you do not have Medicare entitlement under the number shown on this notice. If you do not agree, please contact your local Social Security office."

Remittance remark code MA61: "Did not complete or enter correctly the patient's social security number or health insurance claim number."

20.2.2.5 - Disposition Code 54 (Matched to Cross-referenced HICN)

(Rev. 1, 10-01-03)

- The Host provides the Satellite with disposition code 54 and Trailer 08 with error code 5052 when it discovers a cross-reference number in its own files for the name or number the Satellite submitted. Disposition Code 54 applies only to carrier submitted claims. The possible number and the new full name is returned to the Satellite on Trailers 1 and 10.
- The carrier or FI investigates the information provided and corrects the information on the claim and resends it.
- If the Satellite continues to receive a code 54, it contacts the Host through locally established procedures.

20.2.2.6 - Disposition Code 55 (Personal Characteristic Mismatch)

(Rev. 1, 10-01-03)

- The Host provides the Satellite with this disposition code and Trailer 08 with error code 5052 when it discovers a mismatch of name and personal characteristics such as sex or date of birth.
- The Host returns what it believes to be the proper information on Trailer 10. The header portion of the response also contains the corrected sex and birth date, if applicable.
- The carrier or FI investigates the information provided. The carrier or FI corrects the information on the claim, and resends the claim.
- If the carrier or FI continues to receive a code 55, it contacts the Host through locally established procedures.

20.2.3 - MSP Maintenance Response Record

(Rev. 1, 10-01-03)

B3-6005.3

This informational record is sent in response to the MSP Maintenance Transaction Record sent by the Satellite (See [§20.1.1](#) for MSP Maintenance Transaction Record processing procedures. Note that there have been significant changes in this process.) It acknowledges the Host's receipt of the MSP Maintenance Transaction Record and indicates any errors or informational data. Following are the types of codes and other information associated with this record:

- Disposition codes;
- MSP consistency error codes;
- MSP utilization error codes; and
- Basic Reply Trailers.

For more detailed information about MSP processing in CWF see the MSP Manual, Chapters 4 and 5.

30 - Online Health Insurance Master Record (HIMR) Display

(Rev. 1, 10-01-03)

A3-3800.3, B3-6007

Beneficiary entitlement and utilization data on all nine CWF databases is available online through the HIMR transaction. It allows the Satellite to do further investigation about a claim or inquire about beneficiary entitlement and utilization status. This function is a display of information only. The user at the Satellite site cannot make changes to the screens accessed through HIMR. Refer to CWF Systems Documentation for detailed information about individual HIMR screens. Or see <http://cms.csc.com/cwf/downloads/docs/pdfs/himrnav.pdf> and <http://cms.csc.com/mgmntcwf/docmgmt/pdfs/promptr.pdf> for an explanation and layouts of all the available HIMR screens.

This information is applicable only to Satellites and Host site staff. Providers do not have access to the HIMR screens, but they can request eligibility information via the ELGA and ELGB transaction through their shared system. The response to the ELGA/ELGB is limited to a subset of information from the HIMR screen. See <http://cms.csc.com/cwf/downloads/docs/pdfs/scrHost.pdf> for more information on the HIQA transaction.

40 - Requesting Assistance in Resolving CWF Utilization

(Rev. 1, 10-01-03)

B3-6008

40.1- Requesting Assistance in Resolving CWF Utilization Problems

(Rev. 1, 10-01-03)

B3-6008.1

This section applies only to Satellites; it does not apply to providers.

In the normal course of claims processing activities, Satellites can expect to encounter problems involving the CWF Claim Record and/or basic reply record procedures. The action necessary to resolve the problem depends upon the problem identified. For utilization problems, the Satellite sends all master beneficiary, summary history, and inpatient summary history screen-prints for the beneficiary to the CWF HICR contractor for investigation. The Satellite takes the following steps:

- Put the error code causing the problem in the upper right-hand corner of the Beneficiary Master screen print;
- Mark on all of the screen prints exactly what the problem is and what is believed to be the correction needed;
- The Satellite (contractor) sends these marked screen prints to the CWF HICR contractor. They coordinate with the other contractor to determine who needs to correct the problem; and
- The CWF HICR contractor will investigate the problem and correct it. If a response is not received within 45 days of mailing the request for assistance, the contractor sends a second request marked "SECOND REQUEST."

NOTE: Congressionals are faxed to the CWF HICR contractor. Faxes must be reviewed and corrective action taken within 24-48 hours of receipt.

For problems involving the Host CWF Site, the Satellite utilizes the HICR transaction. This transaction provides the Host CWF site a method of creating transactions that correct the local database.

For more information, see CWF System Documentation,
<http://cms.csc.com/mgmntcwf/docmgmt/pdfs/scrHost.pdf>.

40.2- Social Security Administration (SSA) Involvement

(Rev. 1, 10-01-03)

B3-6008.4

SSA maintains the Master Beneficiary Record (MBR) from which the Health Insurance (HI) Master Record is established. The CWF's eligibility record is accreted from this HI Master Record. The HI Master Record is updated periodically from a variety of sources, including the MBR, and in turn updates the Host maintaining the CWF record. However, errors occur where the MBR fails to correctly update the HI Master Record or where the HI Master Record fails to correctly update the CWF record.

If the problem is caused by difficulties in determining the beneficiary's correct entitlement status, the carrier or FI must request assistance of the SSO. The SSO is responsible for processing the case. Examples of situations covered by this procedure are:

- Problems involving Railroad Retirement Board (RRB) jurisdiction, i.e., the RRB has jurisdiction of the beneficiary's Medicare, and the claim was erroneously referred to the area carrier;
- Evidence that a beneficiary has utilization under more than one health insurance claim number (HICN), but the Satellite is not aware of any cross-reference action taken by CMS; or
- Assistance is needed to obtain or verify a beneficiary's name and/or HICN. (See specific procedures in [§20.2.2.6](#) under disposition code 55.)

In the event the SSO is unable to resolve the entitlement problem, e.g., a disposition code 55 is received after SSA verified the beneficiary's name and/or HICN, the Satellite requests assistance from the RO. It includes complete details of the nature of the problem and a description of its efforts to resolve it.

40.3 - Critical Case Procedure - Establishing Entitlement

(Rev. 1, 10-01-03)

A3-3524, B3-6008.2

The Satellite uses the "critical case" procedure (see [§40.4](#), below) to expedite the processing of claims which have been delayed because of an error in the beneficiary's CWF Master Record. The "critical case" procedure provides speedy correction of the master record. The Satellite uses this procedure when there is an error in the CWF Master Record, which prevents the receipt of an approval disposition code on the basic reply record. This may occur when one of the following conditions exists:

- The Satellite is unable to make payment on a claim even though the beneficiary apparently has entitlement because CWF transmitted a Basic Reply Record with an inaccurate or repeated disposition code of "50," "51," "52," "53," "54," "55," "57," "58," "59," "60," "61," "AB," "CI," "ER," "UR," "CR;" or
- The Satellite received a Basic Reply Record and the recycled CWF Claim Records have not received a disposition code, which permits processing the claim to payment or denial.

40.4 - Referral of Critical Cases to the Regional Office

(Rev. 1, 10-01-03)

A3-3524, B3-6008.3

When the Satellite identifies a claim meeting the criteria listed below, it contacts the RO via established referral methods. The Satellite identifies the beneficiary by name and HICN, specifies the nature of the problem, states that the criteria are met, and gives the dates of all actions. The Satellite provides all available supporting documentation. Examples of such documentation are:

- Social Security Administration's (SSA) reply to Form CMS-1980 in the case of entitlement questions; and
- A copy of the Health Insurance Master Record Entitlement Status Query (ESQ) received from an SSA District Office.

The criteria are:

- Two follow-ups have been made to the Social Security Office (SSO) and the CWF Master Record has not been corrected;
- At least 60 days have elapsed since the correction procedures were initiated;
- A serious hardship to the beneficiary or a public relations problem has developed;
- Corrections or changes to HMO termination dates are necessary; and
- The SSO response indicates that both the MBR and HI Master Records are correct.

The Satellite marks the information "CRITICAL CASE." The Satellite flags the file for special handling and expedites the claim as soon as the reply is received.

The Satellite must diary the case for 30 calendar days. By that time the RO should have a response and advise the Satellite. If the Satellite receives a positive basic reply record before hearing from the RO, it notifies the RO.

50 - Requesting or Providing Assistance to Resolve CWF Rejects

(Rev. 1, 10-01-03)

A3-3860

When a Satellite has difficulty processing a bill because a prior bill was incorrectly processed and posted to CWF by another Satellite (carrier or FI), the two contractors must work together to resolve the error. Where help is needed from another contractor (carrier or FI), the submitting Satellite requests assistance from the contractor whose bill was processed incorrectly. The contractor that processed the bill is identified in the CWF reject trailer.

50.1 - Requesting Contractor Action

(Rev. 1, 10-01-03)

A3-3860

The requesting contractor furnishes the assisting contractor with sufficient information to identify the issue, and perform the necessary resolution actions. The data shown on the Request for Assistance Form (see [Exhibit 1](#)) is needed. This format must be used when designing a form letter so that both the requesting contractor's address and the assisting contractor's address will be visible through a window envelope. A separate page is used for each request to enable the assisting contractor to return each claim as completed instead of holding claims until all claims on a request are completed. The requesting contractor enters its request after "The following action is requested." The requesting contractor provides claim-identifying information as shown. The requesting contractor adds information to help it associate the response with its pending record, if needed.

If a response has not been received within 30 calendar days of the request, the requesting contractor sends a follow-up request. If no response is received within an additional 15 days, follow-up with the RO responsible for the assisting contractor. A status report indicating and defining problems that prevent processing of the request is considered a response in deciding whether to follow-up with the RO.

In addition, the requesting contractor considers whether an interim payment to the provider without CWF approval is appropriate. (See [§60](#) of this chapter for procedures for paying without CWF approval.)

50.2 - Assisting Contractor Action

(Rev. 1, 10-01-03)

A3-3860

Upon receipt of a request for assistance, the assisting contractor adjusts or cancels the posted bill, as appropriate, and informs the requesting contractor by annotating the

request form (under explanation of action taken by assisting contractor) with a description of its action (e.g., adjustment cleared CWF (date), current dates of service are _____.)

The assisting contractor completes corrective actions within 30 calendar days of receiving the request. If it cannot complete action within 30 days, provide a status reply explaining the reasons on a copy of the request form. The assisting contractor sends a copy of the reply to the RO.

The assisting contractor uses the request form on all correspondence to the requesting contractor to facilitate association of its response with the pending action.

50.3- Format for Requesting Assistance From Another Contractor on CWF Edits

(Rev. 1, 10-01-03)

A3-3860

[Exhibit 1](#) contains the required format for requesting assistance. The requesting contractor uses that format in designing its form letter so that both its address and the assisting contractor's address will be visible through a window envelope. The requesting contractor completes all data elements. Note that the form is designed so that a standard number 10 - 4 1/8 by 9 1/2 inch window envelope can be used for your request. The assisting contractor may refold the form and use the same size window envelope in its reply. The requesting contractor enters its address in the bottom address space, and uses the following in the top address space:

Medicare Intermediary Claims Processing Department (if FI),
or
Medicare Carrier Claims Processing Department (if carrier)
Name of Contractor
PO Box or Street Address
City, State, ZIP Code

60 - Paying Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009

The CWF must approve each claim before it is paid. There may be special circumstances, however, when it is necessary to pay claims outside of the CWF system. The CMS will notify the contractor of these instances. They include:

- New coverage policies are enacted by Congress with effective dates that preclude making the necessary changes to CWF timely; and
- Errors are discovered in CWF that cannot be corrected timely. Carriers and FIs are responsible for reporting CWF problems to their host sites.

60.1 - Requesting to Pay Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009.1

The contractor may also request approval from the RO in specific situations to pay claims without CWF approval. Examples of such situations are:

- Other contractors cannot complete action to remove an impediment that blocks a contractor from processing of a claim; and/or
- A systems error cannot be corrected timely, and the provider's cash flow will be seriously endangered.
- Administrative Law Judge (ALJ) decisions, court decisions, and CMS instructions in particular cases may necessitate that payment be made outside the normal CWF process.

60.2- Procedures for Paying Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009.2, R1886A3

Before a claim can be paid outside of CWF, the contractor must obtain approval from CMS Central Office or the RO. In all instances involving payment outside CWF, the contractor applies the following procedures:

- FIs submit the claim with an "X" in the tape-to-tape flag, and the system will determine payment as if the payment were final. Process inpatient PPS payments

through MCE, Grouper and Pricer. Make hospice payments using the appropriate hospice rate. Pay for ESRD visits using the composite rate. Use the appropriate fee schedules or interim rates. Apply deductible and coinsurance based on the most current data available. Do not apply the 70 percent reduction applicable to accelerated payment;

- Carriers should follow shared system procedures to avoid sending claim to CWF at time of payment, but maintain a record for later submission.
- Pay interest accrued through the date payment is made on clean claims. Do not pay any additional interest.
- Maintain a record of payment and implement controls to be sure that duplicate payment is not made, i.e., when the claim record is updated to CWF, or in response to a duplicate request by the provider.
- Monitor CWF to determine when the impediment to CWF processing is removed. Update CWF when the impediment is removed. Show the actual payment date outside CWF in the scheduled payment data field.
- Consider the claim processed for workload and expenditure reports when it is paid.
- Submit to the RO Consortium Contractor Manager (CCM) by the 20th of each month a monthly report of all claims paid without CWF approval. The list of claims paid outside of CWF is to include the following information:
 - HICN
 - Name
 - Provider number
 - Total charges
 - From and through date
 - Amount paid
 - Paid date
 - CWF error condition preventing payment.

Also, include summary data for each edit code showing claim volume and payment.

Send a copy of the summary data to:

CMS, OIS
7500 Security Blvd.
Baltimore, MD 21244-1850

70 - Change Control Procedures

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010

The CWF software is changed quarterly to accommodate revised CMS requirements, new provisions of law, to correct errors, or to enhance the system. Carriers and FIs may also request changes to CWF through certain change control procedures.

70.1- Satellite Procedure

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.1

When a Satellite has a recommendation for software changes, it follows the change control process below:

- Enter change requests into the CWF Information Management System (INFOMAN). For specific instructions about INFOMAN, refer to CWF Systems Documentation chapter on the Information Management System at <http://cms.csc.com/cwf/downloads/docs/pdfs/overcwf.pdf>
- .After entering change requests into INFOMAN, submit all supporting documentation to the Host for review and forwarding to both CMS and the CWF Maintenance Contractor (CWFM) for consideration and entry into the Change Control System.
- Monitor progress of all changes submitted from your site through INFOMAN.
- Review implementation of all changes from your own site to insure that needs are addressed.

70.2 - Process Flow of a Change Request

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.2

- Complete a CMS CWF Change Request (CR) through INFOMAN. When the CR is created a CR number will automatically be assigned.
- Forward three copies of all supporting documentation to the Host site. Include the CR number on all documentation. The Host will review it and the CR for accuracy, completeness, and relevance. The review may also determine whether a problem reported is a CWF problem or a problem with the Satellite's software.

- When the Host approves the CR, it releases the Change Request to the CWFM and to the CMS central office in accordance with current procedures.
- The CMS and the CWFM review the Change Requests as received throughout the month.
- The CMS distributes all change requests to the appropriate CMS component for review and approval as they are received.
- A monthly Change Control meeting of CMS and CWFM staff is held to schedule approved Change Requests for release.
- Following the meeting, the CWFM enters approval and priority status of all Change Requests into the automated system. As work progresses, the CWFM enters the status of all changes, Quality Assurance (QA) activities and work performed.

70.3 - Handling Emergency Problems and Problems With Recent CWF Releases

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.3

A problem is considered an emergency if a large number of claims are paid incorrectly, cannot be paid, or the Satellite/Host system abnormally ends (abends). When an emergency occurs, the Satellite follows these procedures:

1. The Satellite will convey information about the emergency to the Host immediately. The Satellite must be able to submit documentation of the problem.
2. The Host will report the problem to the CWFM immediately via CWFM customer service. The service is available 24 hours a day, 7 days a week.
3. During business hours, CWFM will respond immediately. After business hours, CWFM will contact the Host within one hour of report of the problem.

70.4 - Distribution of "CWF Change Control" Reports

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.4

- CWFM distributes a monthly "Status of CWF Changes" report and "Schedule of CWF Changes" report to all Host sites, CMS ROs, and CMS CO staff.
- Each Host site distributes the reports to its Satellite sites within three working days of receipt.

70.5 - Channels of Communication

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.5

All Satellite inquiries should be made to the Host staff, according to locally established procedures.

70.6 - Schedule of CWF Software Releases

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.6

- **Regular Releases** - Approved CWF Change Requests are programmed into the regular releases of updated CWF software. These releases are quarterly.
- **Emergency Releases** - If there is a serious problem with a release of CWF software, CMS CO and the CWFM have the option to prepare and issue emergency releases of CWF software to resolve the problem(s).
- **Special Releases** - The CWFM will issue special releases as directed by CMS, which contain software changes that affect a specific topic or subject.

80 - Processing Disposition and Error Codes

(Rev. 1, 10-01-03)

B3-6006, CWF DispCode

(<http://cms.csc.com/cwf/downloads/docs/pdfs/dispcode.pdf>)

The results of CWF processing are communicated through a set of codes categorized as either disposition or error codes. There are specific disposition codes for inquiry, transfer/not in file request, and each claim type. Claims have consistency, utilization, A/B crossover, and duplicate error codes. Transactions for End Stage Renal Disease (ESRD), Medicare Secondary Payer (MSP), and Certificate of Medical Necessity (CMN) error codes are also available.

If the Host rejects a claim, the FI or carrier must suspend the claim and review it. After the review is complete and corrections made, they resubmit the claim with an indication that a review was performed and corrections made.

80.1 - Disposition Codes

(Rev. 1, 10-01-03)

80.1.1 - CWF Part A Inquiry Reply Disposition Codes

(Rev. 1, 10-01-03)

80.2 - Inpatient, SNF, Outpatient, Home Health, and Hospice Utilization Error Codes

(Rev. 1, 10-01-03)

**A3-3807, CWF Editutil (<http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>),
B-02-049, A-02-068**

Utilization edit rejects are denoted by a value of UR in the disposition field on the Part A reply record. Trailer 08, containing one utilization error code, will follow. Trailer 12 will be returned for UR and AA dispositions. Listed below are the possible utilization error codes with a general description.

Inpatient, SNF, Outpatient, Home Health, and Hospice Utilization Error Codes

Error Code	Explanation
-------------------	--------------------

AAAA	HOSPITAL
------	----------

UR "AAAA" is set for VA claims which have passed all consistency and utilization edits.

Purpose:

To indicate that no errors have been set.

Resolution:

No resolution necessary.

RT01	OP
------	----

Claim is waiting retrieval of archived history. Claim is to be recycled in six days.

Purpose:

To recall archived outpatient history that relates to current claim processing.

Resolution:

The Host retrieves the archived history records. This retrieval process executes weekly. Resubmit the claim in six days.

RT02	OP
------	----

Attempted history retrieval, but the beneficiary history pointers were full.

Purpose:

The retrieval process found a matching record, but the pointers are full, and the record cannot be retrieved from archived history.

Resolution:

Contact the Host to perform an ARCMINI purge (archiving and purging of pointers) to retrieve the history record.

Error Code	Explanation
28#1	<p>OP</p> <p>The claim contains an Occurrence Span Code "36," the Occurrence Date is greater than the claim Thru Date of Service, and the claim From Date of Service is less than 12/21/2000; or</p> <p>The accumulated days are greater than the Transplant Allowed days; or</p> <p>The service From Date is less than or equal to the Earliest Transplant Discharge Date or greater than or equal to the covered Thru Date of the transplant.</p> <p>Purpose:</p> <p>To ensure that post transplant services are approved only during the post transplant coverage period.</p> <p>Resolution:</p> <p>Reject indicating that the service was not provided within the eligible coverage period.</p> <p>Use MSN 4.2 - "This service is covered up to (insert appropriate number) months after transplant and release from the hospital." - Not used on remittance advice (RA) unless service being denied is exceeding this limit, in which case PR 35 would apply.</p>
5A#1	<p>OP</p> <p>An MCCD outpatient (HUOP) record with demonstration number 37 (Medicare Coordinated Care Demonstration) and units greater than 1 for HCPCS Codes G9001 - G9008.</p> <p>Purpose:</p> <p>To ensure that Medicare pays coordinated care fees only within their allowed frequency.</p> <p>Resolution:</p> <p>Deny the claim using MSN 7.1 - "This is a duplicate of a charge already submitted."</p>

------	------

Hospice claim received and the From Date falls within a posted Hospice election period that has been revoked by the beneficiary, or canceled by the FI (Revocation Indicator is other than zero) and the claim Thru Date is greater than the election period Termination Date.

Purpose:

CWF will not allow creation of a new period by a claim if the previous election period has been revoked by the beneficiary, or canceled by the FI.

Resolution:

Return to provider indicating that a new Hospice NOE is required to begin a new period in this situation.

The Statement Dates on the Home Health claim are overlapping an existing Home Health PPS episode on file without the appropriate Patient Status (06), or Source of Admission Code B, or C.

Effective January 1, 2003, this edit is no longer set when the RAP or claim overlapping an existing episode has the same provider number, and the RAP or claim From Date matches or differs from the episode Start Date of the existing episode. This edit will also no longer be set when a claim which corresponds to an episode of less than 60 days, overlaps another existing episode on which source of admission code B or C is not present.

Purpose:

To ensure that conflicting Home Health claims are not approved.

Resolution:

Reject claim indicating overlapping dates with a HH PPS episode.

For claims submitted April 1, 2002 and after: If the conflicting claim is for an earlier episode than the claim on history and there are no line item dated services that fall within the later episode, the shared systems will change the patient status code to 06 and reprocess the claim as a partial episode payment (PEP) before returning it to CWF.

5386	HH

This bill overlaps a posted bill From Date and Thru date.

Purpose:

To prevent payment to providers for overlapping claims.

Resolution:

For HUIP Bills - The Satellite checks its bill history to determine if the posted HUIP bill was sent by them. If not, request a HIMR from the Host to determine the origin of the posted bill, and contact the originating Satellite to determine where the error in billing dates occurred. The Satellite at fault takes action to correct the error and submits either credit/debit actions or corrects the bill and resubmits it. If this bill needs to be corrected, notify the provider and prepare a remittance advice, if indicated.

For HUOP Bills - This bill overlaps the service dates of a posted HUOP bill and matches Provider Number, Bill Type, Revenue Codes; the last digit of the Bill Type is not a 5 (late charges), and the Action Code is a 1 or 3. Check the bill history to determine if the posted bill was sent by that provider. If another FI processed the posted bill, determine who is at fault. The FI at fault should prepare either a credit/debit adjustment or correct this bill and resubmit. The final remittance advice(s) reflects payment to the provider.

This bill is identified as a Kron bill, but does not meet the Kron bill criteria as:

(1) Occurrence Codes 21, 22, or 23, Occurrence Span Code 77, or Nonpayment Codes R or X appears in history within 60 days of the Kron bill "from" date;

(2) The "through" date on a hospital history bill is within 60 days of the Kron bill "from" date;

(3) A SNF history bill contains all covered days and the "through" date is within 60 days of the Kron bill "from" date; or

(4) A SNF history bill contains covered and noncovered days, but no Span Codes or Occurrence Codes specifying the noncovered period, and the calculated covered "through" date (determined when CWF subtracts the number of noncovered days from the SNF "through" date) is within 60 days of the Kron bill "from" date.

Purpose:

5902	S
------	---

A claim was submitted within 60 days prior to a spell of illness that contains a KRON bill as the earliest claim.

Purpose:

Error Code	Explanation

5903	H
------	---

This Kron bill received within 60 days before the "from" date of an inpatient bill with Nonpayment Code B, benefits exhausted or beneficiary chose not to use lifetime reserve days. Nonpayment code B no longer applicable due to Kron bill's establishment of a new spell of illness. The incoming inpatient claim contains the Kron Indicator and will split the posted spell of illness into two spells. However, the split would cause an under-utilization situation in the "first" spell.

Purpose:

To prevent an under-utilization situation in a previously processed claim.

Resolution:

CWF Trailer Code 06, overlap/duplicate bill trailer, is returned with edit 5903 to identify the Nonpayment Code B bill. Cancel the Nonpayment Code B bill. Reprocess the Kron bill to payment, and then re-enter the B bill, but without Nonpayment Code B. If the B bill was processed by a different FI than that processing the Kron bill, the Kron FI must notify the B FI to cancel and subsequently resubmit the corrected B bill.

5904	H
------	---

The Kron bill submitted requires that an existing spell of illness be split into two spells, but the spell of illness on the master record is not consistent with the spell data in history.

Purpose:

To assure proper calculation of spell of illness.

Resolution:

Forward a printout highlighting the problem field(s), annotated with the correct information to CWF Host using CWF assistance request. Reprocess the Kron bill for system payment when the edit condition has been cleared.

The transaction is an Action Code 7 (history add only), Action Code 4 (cancel only) or Action Code 3 (debit adjustment) and it contains a cash deductible amount but the deductible amount is greater than the amount for the trailer year that matches the service year of the claim.

HOSP

Hospice adjustment is processing to cancel a bill on history, and the number of utilization days on the bill being cancelled is greater than the number of utilization days indicated on the Hospice period the bill falls into.

Purpose:

To ensure proper calculation of deductible and utilization.

Resolution:

Correct deductible/utilization days and resubmit.

6008	H, S
------	------

The bill being adjusted was cancelled during the process of rebuilding spells from history. The new debit was not applied.

Purpose:

To ensure that previously canceled claims cannot have adjustments processed against them.

Resolution:

Return to provider indicating that the claim had been previously canceled. If claim needs to be processed, submit a payment only claim (Action Code 1).

------	----

Action Code = 7 (restore bill history record) insufficient expenses in beneficiary master trailer for this record.

Purpose:

To ensure that when a history add-only action is received (outpatient claim with an Action Code 7), there has been sufficient utilization posted. The only problem is that the claim is missing from history, but had been processed by either the UNIBILL batch system or CWF previously.

Resolution:

Since this claim had not been previously posted by either the UNIBILL batch system or the CWF system, resubmit the outpatient claim as an Action Code 1. Ensure the claim is not paid again, if previously paid.

**Error
Code****Explanation****Resolution:**

Change the bill to indicate Medicare primary payer and notify the provider unless development has assured the contractor that it is correct. Send an MSP maintenance transaction record to update the Host MSP Auxiliary File and resubmit the bill.

Resolution: (AB-00-107)

(1) Resubmit claim without an override code; or

(2) Create an "I" MSP auxiliary record. An auxiliary record must be present to process a claim using an override code.

Override Codes will be used as follows:

Override code M = GHP services involved. Verify MSP auxiliary record exists. Matching criteria: Dates of Service on claim fall within Effective and Termination Dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

Override Code N = Non-GHP involved. Verify MSP auxiliary record exists. Matching criteria are: Dates of Service on the claim fall within Effective and Termination Dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

NOTE: Part B/carrier - Override Code "M" or "N" should be placed in MSP Code (field 95) of the CWF Part B claim record. When processing any primary claim not using an Override Code, this field must be left blank.

6810

Part A claim was processed and only a Part B/carrier (Insurer type K) matching record was found.

Hospital bill not subject to PPS or covered SNF bill contains Dates of Service (statement From and Thru date) that span more than two calendar years. Only PPS hospital and noncovered SNF claims can contain more than two calendar years within the Dates of Service.

Purpose:

To accommodate correct processing of bills spanning 3 or more years with covered and noncovered days and are part of two spells of illness in addition to a catastrophic record.

Resolution:

Return to provider indicating that the bill needs to be split.

80.3 - Part B/Carrier and DMEPOS Utilization Error Codes

(Rev. 1, 10-01-03)

B3-6011, CWF Editutil (<http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>),
B-02-049,

Utilization edit rejects are denoted by a value of "UR" in the disposition field on the Part B/carrier Reply Record. A Trailer 08, containing four utilization error codes, will always follow. A Trailer 12 will also be returned for UR & AA dispositions. Listed below are the possible utilization error codes with a general description of the error and a general description of the corrective action to be taken. This action is meant to be a re-examination of the claim information the contractor has on hand, and correction of the information submitted on the CWF Part B/carrier or DMEPOS Claim Record, not an exhaustive search for additional information.

Part B/Carrier and DMEPOS Utilization Error Codes

Error Code	Explanation
------------	-------------

RT01	Claim is waiting retrieval of archived history.
------	---

Purpose:

To inform the FI that archived history is being retrieved and that they should hold claim before attempting to reprocess.

Resolution:

The Host retrieves the archive history records, a process that is executed weekly. Resubmit the claim in 6 working days.

RT02	Attempted history retrieval, but the beneficiary history pointers were full.
------	--

Purpose:

To notify the carrier that a history retrieval was unsuccessful.

Resolution:

Request the record manually or use the accrete process.

5050	Beneficiary record has been deleted by CMS.
------	---

Purpose:

To notify the carrier/DMERC that a Beneficiary Record has been deleted.

Error Code	Explanation
-----------------------	--------------------

Resolution:

The beneficiary number requested by this claim is not available to the HOST. This record has been deleted at the CMS central office. The number the contractor is trying to use is a possible incorrect number and should be investigated through Social Security.

If beneficiary number is correct, deny claim using MSN 5.1 - "Our records show that you do not have Medicare entitlement under the number shown on this notice. If you do not agree, please contact your local Social Security office."

5052	Beneficiary Identification Incorrect - The Name and/or Claim Number shown on the bill is incorrect or claim number is not in file (not used for UR, used only for Disposition Codes 50, 51, 52, 53, 54, 55).
------	--

Purpose:

To ensure that the correct beneficiary is identified.

Resolution:

Take action indicated by the disposition code received. (See [§20.2.2](#))

5053	Beneficiary is temporarily blocked due to a merge of beneficiary data mandated by CMS.
------	--

Purpose:

To prevent processing of transactions while beneficiary history data is being merged.

Resolution:

Recycle claim every 15 days until approval, adjustment, or reject response is received, or until otherwise notified.

5054	Beneficiary Auxiliary record missing and requested from CMS.
------	--

Purpose:

To inform the carrier/DMERC that a Beneficiary Record is temporarily unavailable and that they should hold claim before attempting to reprocess.

Error Code	Explanation
------------	-------------

	Resolution:
--	--------------------

	Recycle claim in specified number of days.
--	--

5055	Beneficiary blocked at CWF Host and CMS batch pending clerical update.
------	--

	Purpose:
--	-----------------

	To inform the carrier/DMERC that a Beneficiary Record is temporarily unavailable and that they should hold claim before attempting to reprocess.
--	--

	Resolution:
--	--------------------

	Recycle claim every 15 days until an approval, adjustment, or reject response is received, or until otherwise notified.
--	---

5056	The beneficiary number requested on this claim is not available to the Host. This record is marked as a skeleton at CMS central office and has been purged. The number being used is a possible incorrect number.
------	---

	Purpose:
--	-----------------

	To inform the carrier/DMERC that a Beneficiary Record is unavailable and that further investigation may be necessary.
--	---

	Resolution:
--	--------------------

	Check with the SSO to determine the proper HICN for this beneficiary. If the HICN and ID are correct, resubmit the bill in 15 working days.
--	---

5057	The beneficiary number requested by this claim is not available to the Host at this time because the Beneficiary Record at CMS central office has a skeleton record. (This is done when the beneficiary has a date of death and the beneficiary has not had claims activity for at least 6 months.)
------	---

	Purpose:
--	-----------------

	To inform the carrier/DMERC that a Beneficiary Record is temporarily unavailable and that they should hold claim before attempting to reprocess.
--	--

	Resolution:
--	--------------------

	Recycle claim every 15 working days. If 45 days pass without an approval, adjustment or reject (AAR) response, contact the RO.
--	--

5620	<p>Beneficiary record is full, cannot update history.</p>

Error Code	Explanation
------------	-------------

Purpose:

To notify a carrier/DMERC when a beneficiary's record is full.

Resolution:

Contact Host to request purge of beneficiary's history.

6000	Adjustment Claim - Unable to find match on history.
------	---

Purpose:

To ensure adjustments are processed against the correct history claim.

Resolution:

Check ARCPTRS file to determine if history record is available. If dates of service differ from the archived record, use the manual retrieval process. If there is no archived record, use the entry code 9 process.

6010	Adjustment Claim - No match to history claim.
------	---

Note:

Entry Code 3 (Full Credit) - Match on Processing Carrier Number, Document Control Number, and First and Last Expense Dates; Cancel Date on history record is zero.

Entry code 5 (Replacement Debit) - Match on Processing Carrier Number, Document Control Number, and Year of Service; Cancel Date on history record is zero.

Purpose:

To ensure adjustments are processed against the correct history claim.

Resolution:

If the claim history exists under a different service date year than the service date year on the replacement debit, then resubmit the action as an Entry Code "3" cancel only claim followed by an Entry Code "1" debit claim.

6020	Adjustment Claim - insufficient expenses in the beneficiary master trailer for full credit (entry code 3 or 5).

Error Code	Explanation
-----------------------	--------------------

Resolution:

Change the bill to indicate Medicare primary payer and notify the provider unless development has assured the contractor that it is correct. Send an MSP Maintenance Transaction record to update the Host MSP Auxiliary File and resubmit the bill.

Resolution: (AB-00-107)

(1) Resubmit claim without an override code; or

(2) Create an "I" MSP auxiliary record. An auxiliary record must be present to process a claim using an override code.

Override codes will be used as follows:

Override code M = GHP services involved. Verify MSP auxiliary record exists. Matching criteria: Dates of service on claim fall within effective and termination dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

Override code N = Non-GHP involved. Verify MSP auxiliary record exists. Matching criteria are: Dates of service on the claim fall within effective and termination dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

NOTE: Part B - Override code "M" or "N" should be placed in MSP Code (field 95) of the CWF Part B Claim record. When processing any primary claim not using an override code, this field must be left blank.

6811	Part B Only
------	-------------

DMERC claim was processed, and only a Part A (Insurer Type "J") matching record was found.

Error Code	Explanation
	<p>Purpose:</p> <p>To ensure that Medicare pays only for services for which the beneficiary is entitled.</p> <p>Resolution:</p> <p>Deny claim, use MSN 5.5 - "Our records show you did not have Part B coverage when you received this service. 86X6	<p>Part B Only</p> <p>Claim line Dates of Service do not fall within a certificate period on the CLIA record for the CLIA number on the claim line.</p>

Error Code	Explanation
------------	-------------

Purpose:

To ensure that CLIA certification is in place for dates of service.

Resolution:

Reject the claim.

86X7	Part B Only
------	-------------

Line item HCPCS code category does not match the category type of the certificate for the line item From Date.

Purpose:

To ensure that the proper CLIA certification is in place for dates of service.

Resolution:

Reject the claim.

86XD	Part B Only
------	-------------

CLIA certificate type is regular (type 1), accreditation (type 3), or partial accreditation (type 5); and although at least one of the lab Class Codes associated with the claim line HCPCS code, on the HCPCS record, matches the Specialty/Sub-Specialty Code(s) on the CLIA record, the claim line From Date of Service does not fall within the effective and termination dates, inclusive, of the matched Specialty/Sub-Specialty Code(s) on the CLIA record.

Purpose:

To ensure that the proper CLIA certification is in place for dates of service.

Resolution:

Reject the claim.

D901	DMEPOS Only
------	-------------

DMEPOS item requires Certification; there are no CMN records for this Beneficiary and DMEPOS item, and there is no "MS" modifier present on the claim.

Error Code	Explanation
	<p>Purpose:</p> <p>To ensure proper certifications are maintained.</p> <p>Resolution:</p> <p>Return to provider indicating that a CMN is required.</p> <p>Use MSN 8.21 - "This item cannot be paid without a new, revised or renewed certificate of medical necessity."</p>
D902	<p>DMEPOS Only</p> <p>DMEPOS Service Date not within a valid Certification date range. First and last line item service dates are not contained within the CMN date range.</p> <p>Purpose:</p> <p>To ensure proper certifications are maintained.</p> <p>Resolution:</p> <p>Return to provider indicating that a corresponding CMN is not on file for the dates of service.</p> <p>Use MSN 8.36 - "Payment is denied because the certificate of medical necessity on file was not in effect for this date of service."</p>
D903	<p>DMEPOS Only</p> <p>For HCPCS codes that require a CMN (Category 59):</p> <p>Capped Rental, Electric Wheelchair and PEN pump claims (without the "MS" or "RP" modifiers) are not allowed once the purchase option or rental cap has been met. CHOICES and ESRD Managed Care Demonstration claims are not subject to this edit under these circumstances.</p> <p>For HCPCS codes that do not require a CMN:</p> <p>Paid Claims History (PCH) indicates that the rental cap has been met for HCPCS codes of E0452, E0570, or E0600 and claims with these HCPCS codes are not allowed once the rental cap has been met. CHOICES and ESRD Managed Care Demonstration claims are subject to this edit under these circumstances.</p>

Error Code	Explanation
-----------------------	--------------------

Purpose:

To limit the duration that Medicare will pay for rental equipment.

Resolution:

Deny the claim.

D904	DMEPOS Only
------	-------------

Claims for the maintenance of DMEPOS items are allowed only if the rental cap has been met and cannot take place until six months have passed from the Certification End Date (three months for parenteral pumps).

Purpose:

Maintenance fees are paid only after a rental cap has been met and can be billed only once every 6 months.

Resolution:

Deny the claim using MSN 8.14 - "Your equipment supplier must furnish and service this item for as long as you continue to need it. Medicare will pay for maintenance and/or servicing for every 6-month period after the end of the 15th paid rental month."

D906	DMEPOS Only
------	-------------

Inexpensive/Routinely Purchased item rental payments cannot exceed the cost of the item. The sum of the rental payments must not exceed the DME allowed amount.

Purpose:

The total rental payment amount may not exceed the allowed amount of a direct purchase.

Resolution:

Deny or reduce the allowed amount on the claim. Use MSN 8.6 - "A partial payment has been made because the purchase allowance has been reached. No further rental payments can be made."

Error Code	Explanation
D907	<p>DMEPOS Only</p> <p>Claim Type of Service does not match the Type of Service on the DMEPOS certification.</p> <p>Purpose:</p> <p>To ensure proper certifications are maintained.</p> <p>Resolution:</p> <p>Return to provider indicating discrepancy. Use MSN 8.21 - "This item cannot be paid without a new, revised or renewed certificate of medical necessity."</p>
D908	<p>DMEPOS Only</p> <p>Claim for Oxygen equipment must be based on the Flow Rate requirement established in the DMEPOS certification.</p> <p>Purpose:</p> <p>To ensure correct payment for Medicare services.</p> <p>Resolution:</p> <p>Recalculate allowed amount and resubmit.</p>
D909	<p>DMEPOS Only</p> <p>Immunosuppressive drug record Last Expense Date is greater than the coverage period when compared to the most recent Medicare covered transplant Discharge Date on the CMN record.</p> <p>Purpose:</p> <p>To ensure that Medicare does not pay for services for which the beneficiary is not entitled.</p> <p>Resolution:</p> <p>Deny the claim using MSN 4.2 - "This service is covered up to (insert appropriate number) months after transplant and release from the hospital. - Not used on remittance advice (RA) unless service being denied is exceeding this limit, in which case PR 35 would apply."</p>

Error Code	Explanation
------------	-------------

D910	DMEPOS Only
------	-------------

Immunosuppressive Drug Claim shows First-Expense Date is less than the Discharge Date of a covered transplant hospital stay, or is not within the covered period of a transplant Discharge Date using the CMN Transplant Discharge Date.

Purpose:

To ensure that Medicare does not pay for services for which the beneficiary is not entitled.

Resolution:

Deny the claim using MSN 4.2 - "This service is covered up to (insert appropriate number) months after transplant and release from the hospital. - Not used on remittance advice (RA) unless service being denied is exceeding this limit, in which case PR 35 would apply."

D912	DMEPOS Only
------	-------------

A full CMN must be posted to the CMNAUX file before a PEN HUDC transaction will be accepted. PEN HUDC transactions, which are in DMEPOS category 7, cannot be processed if the matching CMN record is a skeleton CMN.

Purpose:

To ensure proper certifications are maintained.

Resolution:

Return to provider indicating need for full CMN.

Use MSN 8.21 - "This item cannot be paid without a new, revised or renewed certificate of medical necessity."

D919	DMEPOS Only
------	-------------

Only one month of service per detail for this HCPCS code. The HCPCS code on the detail is Capped Rental or PEN Pumps, and the "Number of Services" field on the detail contains a value greater than 1.

Error Code	Explanation
------------	-------------

Purpose:

Only one month of service is allowed per detail line for the HCPCS code.

Resolution:

Return to provider for correction, if more than one month of service is being billed split the bill into multiple line items.

D921	DMEPOS Only
------	-------------

Therapeutic Shoes, Inserts, or Modification HCPCS codes without modifier RT or LT must have a units value of 2, 4, or 6.

Purpose:

Information required for proper payment.

Resolution:

Return to provider for addition of information.

Use MSN 9.7 - "We have asked your provider to resubmit the claim with the missing or correct information." (NOTE: Add-on to other messages as appropriate.)

D922	DMEPOS Only
------	-------------

Annual maximum allowance of therapeutic shoes, inserts, or modifications exceeded.

Purpose:

To ensure that Medicare does not pay for services for which the beneficiary is not entitled.

Resolution:

Deny the claim using MSN 17.8 - "Payment was denied because the maximum benefit allowance has been reached."

Error Code	Explanation
-------------------	--------------------

D929	DMEPOS Only
------	-------------

PEN Pump (HCPCS code Category "10") or Oxygen (DMEPOS Category "5") claim with Dates of Service that are greater than the CMN Scheduled Recertification Date and less than the CMN End Date on the CMN record.

Purpose:

To ensure required CMN information is up-to-date.

Resolution:

Return to provider, indicating that a new CMN will need to be filed prior to processing of this claim.

80.4 - IP, SNF, OP, HH, and Hospice Consistency Error Codes

(Rev. 1, 10-01-03)

A3-3809, CWF Editcons (<http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>), A-02-031, A-02-064

The following are Part A consistency edits and the Bill Types each edit is applied to: General-all; H-Hospital; S-Skilled Nursing Facility; HH-Home Health; HOSP-Hospice; OP-Outpatient; NOE-Hospice Notice of Election.

Consistency edit rejects are denoted by a value of "ER" in the disposition field on the Part A Reply Record. A Trailer of 08 containing up to four Consistency error codes will always follow. Listed below are the possible Consistency error codes with a general description.

Occurrence Codes		
The third digit of the following error codes represents the sequence in which the code occurred. The sequence is 1 through 0, with 0 representing the 10th code.		
28#1	H, S, HH, HOSP, OP Invalid occurrence code.	Correct the occurrence code and resubmit claim.
28#2	S Date Guarantee of Payment Began--entry is inappropriate as this item applies only to hospital bills.	Remove date from claim and resubmit.
28#3	H Date Guarantee of Payment Began--Hospital Bill. Date is earlier than the admission date or later than the statement covers Thru Date.	Verify dates and resubmit claim.
28#4	H Date of Guarantee of Payment Began--Utilization days cannot exceed 12 days beyond the admission date, if admission date and the statement covers period From Date are the same, unless the billing dates cover the period 12/24 through 1/2, in which case 13 days cannot be exceeded.	Verify dates and resubmit claim or return to provider for correction.

Error Code	Explanation	Action
28#5	H If the Guarantee of Payment Date is shown and the admission date and From Date are not equal, utilization days cannot exceed 12 days, unless the billing dates cover the period 12/24 thru 1/2, in which case 13 days cannot be exceeded.	Verify dates and resubmit claim or return to provider for correction.
28#6	H The Date Guarantee of Payment Began is earlier than the Date Benefits Exhausted (Occurrence Code 23).	Verify dates and resubmit claim or return to provider for correction.
28#7	H The Date Guarantee of Payment Began plus utilization days (less coinsurance and non-utilization days) cannot exceed the statement covers period Thru Date, unless the patient status code is 30 (Still Patient), in which case the Thru Date cannot be exceeded by more than 1 day.	Verify dates and resubmit claim or return to provider for correction.
28#8	H, S Active Care Ended date is after the Thru Date.	Verify dates and resubmit claim or return to provider for correction.
28#9	H, S Utilization days exceed the number of days between the From Date and the Date Active Care Ended (Occurrence code 22) minus any days for Noncovered Level of Care (Occurrence Span Codes 74, 76, 77, 79, and M1) reported on the bill.	Recalculate utilization days and resubmit claim.

Error Code	Explanation	Action
28#A	H, S Utilization days are greater than the number of days between the From Date and the date benefits exhausted and on a hospital bill, and Guarantee of Payment Began Date is not present.	Recalculate utilization days and verify all dates. Resubmit claim if appropriate.
28#B	HH, HOSP, OP The benefits exhausted date is prior to the From Date.	Verify the benefits exhausted date and the From Date. Benefits exhaust date should be later than From Date on claim. Resubmit claim.
28#C	HH, HOSP, OP The date the benefits were exhausted is not greater than the stay From Date.	Verify the benefits exhausted date and the stay From Date. Resubmit claim if appropriate, otherwise deny.
28#E	H, S, OP, HH More than one Benefits Exhausted Date Occurrence Code (A3, B3, C3-in any combination) is present on the claim.	Verify appropriate Occurrence Code and remove others. Resubmit claim.
28#L	H More than one Occurrence Code 20 has been found on a single claim.	Verify Occurrence Code 20 date and remove all other occurrences from claim. Resubmit claim.
28#M	HOSP Occurrence Code 42 date does not equal the service Thru Date on the claim.	Verify dates and resubmit claim.

Error Code	Explanation	Action
28#N	<p>H, S, OP</p> <ul style="list-style-type: none"> • Claim indicates benefits exhausted, Medicare is primary and the Occurrence Code present is not A3; • Claim indicates benefits exhausted, Medicare is secondary and the Occurrence Code present is not B3; or • Claim indicates benefits exhausted, Medicare is tertiary and the Occurrence Code present is not C3. 33#1	<p>H, S</p> <p>A span code from or Thru Date is an invalid or inconsistent date entry.</p>	Verify span code dates and resubmit claim.
33#2	<p>S</p> <p>Qualifying Stay Dates--The Thru Date is the same as, or prior to, the From Date.</p>	Correct dates and resubmit claim.

Error Code	Explanation	Action
33#3	S Qualifying Stay Dates--The 3-day stay requirement is not met or in the case of a Rural Primary Care Hospital (RPCH) 2 days. The Thru Date is not 3 or more days later than the From Date or in the case of a RPCH 2 days.	Verify dates. Resubmit claim if appropriate or deny for lack of a qualifying stay. Use MSN 13.2 - "Skilled nursing facility benefits are available only after a hospital stay of at least 3 days."
33#4	S Qualifying Stay Dates--the Thru Date is later than the current admission date.	Verify dates. Resubmit if appropriate or deny for lack of qualifying stay. Use MSN 13.2 - "Skilled nursing facility benefits are only available after a hospital stay of at least 3 days."
33#5	H Occurrence span code 70 dates are invalid due to: 1) Span code From Date is equal to the From Date of the statement and it is not a catastrophic transition claim; or 2) The claim from and Thru Dates are catastrophic.	Verify dates and resubmit or deny claim if appropriate.
33#6	OP Screening Colorectal or Screening Prostate Cancer are billed multiple times on the same claim.	Deny duplicate line items using MSN 7.1 - "This is a duplicate of a charge already submitted."

Condition Codes

The second and third digit of the following error codes represents the sequence of the condition code reported on the bill.

Error Code	Explanation	Action
35#1	H Condition Codes 61/66 cannot be present on a non-PPS claim or there is more than one PPS Condition Code present or; Condition Code "65" is present on a PPS claim.	Return to provider for verification of Condition Codes.
35#2	H Condition Code 61 (Cost Outlier) is present and Value Code 17 is not present.	Return to provider for addition of Value Code 17 and amount.
35#4	SNF, OUTP, HHA, Hospice Condition Code 69 is invalid on Bill Type other than 11X.	Verify Condition Code and TOB. Resubmit claim.
3900	General ICN is blank, or invalid.	Correct ICN and resubmit claim.
Value Code		
The third digit of the following error codes represents the sequence of the Value Code reported on the bill.		
4600	H PPS capital total amount not equal to the sum of its parts.	Recalculate total and resubmit claim.
46#1	General Valid Value Code contains an impossible amount.	Correct value code amount and resubmit claim.

Error Code	Explanation	Action
46#2	General Blood deductible amount present with no blood deductible pints.	Validate blood deductible fields. Resubmit claim if appropriate.
46#3	H, S, OP Value Code 06--Medicare blood deductible is reported, but the total charges and noncovered charges for revenue center code 001 are equal, indicating that blood cannot be applied towards the blood deductible.	Validate blood deductible, total charges, and noncovered charges. Resubmit claim if appropriate.
46#4	H Value Code A1, B1, or C1 and the Inpatient deductible amount shown exceeds Inpatient deductible for the year.	Recalculate deductible and resubmit claim.
46#5	S Value Code A1, B1, or C1-Inpatient Deductible is present on a SNF Bill.	Correct Value Code. Resubmit claim.
46#6	H Value Code 17--Outlier amount is present, but neither a Day Outlier (Condition Code 60) nor Cost Outlier (Condition Code 61) is reported.	Add appropriate Condition Code (60 or 61) as appropriate or remove Value Code 17.
46#7	H Value Code 17 - Outlier amount is greater than the reimbursement amount or the Y4 amount with Demo Number 06, 07, or 08; plus the total deductible and primary payer amount.	Verify outlier amount and resubmit claim.

Error Code	Explanation	Action
46#8	H, OP More than one Cash Deductible Value Code (A1, B1, or C1 - in any combination) is present on the claim.	Remove inappropriate value codes and resubmit claim.

80.5 - Part B and DMEPOS Consistency Error Codes

(Rev. 1, 10-01-03)

B3-6011, CWF EditCons (<http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>)

Consistency edit rejects are denoted by a value of "ER" in the disposition field on the Part B Reply Record. A Trailer 08, containing up to four consistency error codes, will always follow. Listed below are the possible consistency error codes with a general description of the error and a general description of the corrective action to be taken. This action is meant to be a reexamination of the claim information the contractor has on hand, and correction of the information submitted on the CWF Part B or DMEPOS Claim Record, not an exhaustive search for additional information.

A/B Crossover edit rejects are denoted by a value of CR in the disposition field on the Reply Record. A Trailer 08 containing one crossover error code, will always follow. Also, Trailer 12 will be returned. A/B Crossover alerts are denoted by a value of 01 in the disposition field on the Reply Record. A Trailer 13 containing one crossover Alert Code, will always follow. Listed below are the possible crossover Error and Alert Codes with a general description.

A/B Crossover Error Codes

Error Code	Explanation
------------	-------------

7010	Reject
------	--------

- An inpatient, outpatient, or home health bill with dates of service equal to or overlapping a Hospice election period, and Condition Code 07 (Treatment of a non-terminal condition) is not present on the bill; or
- An MCCD Notice of Election (89A) From Date overlaps a Hospice election period.

Purpose:

To detect bills during a hospice benefit period when a non-terminal condition is not reported.

Resolution:

Deny the bill, use MSN 27.1 - "This service is not covered because you are enrolled in a hospice."

7020	Reject
------	--------

Claim Bill Type is 12X and the From/Thru dates are equal to the posted outpatient 73X Bill Type service dates or Span Code 72 From/Thru dates.

Purpose:

To detect duplicate billing of inpatient and FQHC services.

**Error
Code****Explanation****Resolution:**

Deny the claim as a duplicate, use MSN 7.1 - "This is a duplicate of a charge already submitted."

7050

Reject

- An Outpatient claim (Bill Type 12X, 13X, 14X, 22X, 23X, 24X, 71X, 72X, 73X, 74X, 75X, 83X, or 85X) has From/Thru Dates (or Occurrence Span Code 72 From/Thru Dates), which are equal to, overlap, or are within the From/Thru Dates on a Hospital Inpatient claim (Bill Type 11X, 21X, or 41X) in history. The Provider Number on the incoming claim is the same as the Provider Number on the history claim; or
- An Outpatient claim (Bill Type 12X, 13X, 14X, 22X, 23X, 33X, 34X, 74X, or 75X) for physical therapy, occupational therapy, and/or speech therapy has From/Thru Dates (or Occurrence Span Code 72 From/Thru Dates) which are equal to, overlap, or are within the From/Thru Dates on an SNF Inpatient claim (Bill Type 18X, 21X, or 28X,) for physical therapy, occupational therapy, or speech therapy. The Provider Number on the incoming claim is the same as the Provider Number on the history claim.

Purpose:

To detect duplicate bills for physical, speech and/or occupational therapy.

Resolution:

Deny the bill as a duplicate, use MSN 7.1 - "This is a duplicate of a charge already submitted."

7055

Reject

Outpatient services (Bill Types 13X, 14X, or 83X) billed with From/Thru Dates that are equal to, within, or overlapping the From/Thru Dates on an outpatient ambulatory surgical claim (ASC - Bill type 83X). The Provider Number of both claims are the same.

Purpose:

To ensure that Medicare does not pay for the same services more than once.

**Error
Code**

Explanation

Resolution:

Deny the bill if the same provider submitted a duplicate claim, use MSN 21.7 - "This service should be included on your inpatient bill." If the services are furnished by a different provider or are not duplicated, refer the bill to medical review for determination of medical necessity. If the claim is denied as a duplicate or as the result of medical review, recover the erroneous payment and process an adjustment to the Host.

7109

Reject

An Outpatient claim with the Thru date (or Occurrence Span Code 72 Thru Date) greater than the Inpatient Admission Date minus four days or is equal to the Inpatient Admission Date and one or more diagnostic Revenue Codes or procedure codes are present.

Purpose:

To detect outpatient bills that should be included on an inpatient history bill.

Resolution:

Return the outpatient bill to the provider. The provider may adjust the inpatient bill if charges were omitted. If Part B deductible or coinsurance were collected by the provider, any monies collected must be returned to the beneficiary.

7111

Reject

An inpatient PPS bill (type 111, condition code 65 not present) is posted to the Host history and the From date (on the posted bill) is equal to the Through date on the incoming inpatient PPS bill (type 111, condition code 65 not present) and the patient discharge status is 01 (discharged to home or self care).

As of October 1, 2002, this edit is bypassed if one of the bills, either history or incoming has an IRF provider number (XX-3025 – XX-3099 or the third position of the provider number is "T").

Purpose:

To identify transfers between PPS hospitals. This reject prevents incorrect DRG payments.

Error Code	Explanation
	<p>Resolution:</p> <p>Change the patient status code to 02 (transferred to another acute care facility) and reprocess the bill.</p>
7112	<p>Reject</p> <p>Inpatient claim (HUIP record) From Date or From Date minus 1 day equals the last service date (or Occurrence Span Code 72 First/Last Visit Date) on a posted Part B claim (HUOP record) and the provider numbers are the same.</p> <p>Purpose:</p> <p>To detect inpatient bills that have posted Part B bills with charges that should have been bundled into the inpatient bill.</p>
	<p>Resolution:</p> <p>Cancel the outpatient bill, use MSN 21.7 - "This service should be included on your inpatient bill." Notify the provider why the outpatient bill was canceled. If any beneficiary Part B deductible was collected on the canceled Part B bill, the beneficiary must be paid any amounts collected towards that outpatient bill. Ensure that the inpatient bill has the outpatient charges included. After the outpatient bill is canceled, resubmit the inpatient bill for processing.</p>
7113	<p>Reject</p> <p>An inpatient claim with the Admission Date less than 4 days from the Through Date (or Occurrence Span Code 72 date) on an outpatient history record and the outpatient claim is for diagnostic services only.</p> <p>Purpose:</p> <p>To detect outpatient bills for diagnostic services that should have been bundled into the inpatient bill.</p>
	<p>Resolution:</p> <p>Cancel the outpatient claim and recover any payment, use MSN 21.7 - "This service should be included on your inpatient bill." Return the inpatient bill for verification that the appropriate charges are posted to the inpatient bill.</p>

Alert

An inpatient claim (11X), outpatient claim (13X) or ASC claim (83X) for the same beneficiary, having the same one time only surgical procedure performed on different dates of service in the same or a different place of service as a claim on history.

Purpose:

To detect billings for surgical procedures that are not bilateral procedures that had been previously performed.

Resolution:

Review the bill to determine if the correct procedure code(s) was entered into the system. If the corrected code is not a duplicate of the code in the Trailer 13 record, release the claim for processing. If the coding is correct, forward the claim to medical review. If the alerted claim is subsequently denied, recover the erroneous payment and process an adjustment to CWF, use MSN 7.1 - "This is a duplicate of a charge already submitted." If the alerted claim is correct but a prior claim is in error, adjust the prior claim or contact the appropriate servicing FI for the prior claim.

SP53 The maintenance transaction was for Working Aged EGHP, and there is a Disability EGHP entry on file that has a Termination Date after the Effective Date on the incoming transaction, or is not terminated, and the Contract Number on the maintenance transaction is not equal to 11102, 11104, 11105, 11106, 33333, 66666, 77777, or 88888.

Purpose:

To ensure overlapping MSP records are not created.

Resolution:

Verify dates and resubmit.

SP54 MSP Code A, B, or G has an effective date that is in conflict with the date the beneficiary attained age 65. For MSP Code A, the effective date must not be prior to the date the beneficiary attains age 65. For MSP Code B and G, the effective date must not be later than the date the beneficiary attains age 65.

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit.

SP55 MSP effective date is prior to beneficiary's Part A or Part B entitlement dates.

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit.

SP56 MSP PHP Date must be equal to, or greater than, MSP Effective Date, or less than MSP Termination Date.

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit.

SP57 Termination Date is greater than six months prior to date added for Contractor Numbers other than "11100-11114," "33333," "55555," "77777," "88888," or "99999."

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit or contact Host.

SP58 Invalid Insurer Type, MSP Code, and Validity Indicator combination.

Purpose:

To ensure that codes do not contradict each other.

Resolution:

Verify Insurer Type, MSP Code, and Validity Indicator. Resubmit.

SP59 Invalid Insurer type, and Validity Indicator combination.

Purpose:

To ensure that codes do not contradict each other.

Resolution:

Verify Insurer Type and Validity Indicator. Resubmit.

SP60 Other Insurer Type for same period on file (Non J or K), Insurer Type on incoming maintenance record is equal to J, or K, and Insurer Type on matching Auxiliary record is not equal to J, or K.

Note: Edit applies only to MSP codes

A - Working Aged

B - ESRD EGHP

G - Disability EGHP

Purpose:

To ensure proper processing of MSP information.

Resolution:

Verify Insurer Type and resubmit.

SP61 Other Insurer type for same period on file (J or K) Insurer type on incoming maintenance record is not equal to J or K, and Insurer type on matching Aux. record is equal to J or K.

Note: Edit applies only to MSP codes

A - Working Aged

B - ESRD EGHP

G - Disability EGHP

Purpose:

To ensure proper processing of MSP information.

Resolution:

Verify Insurer Type and resubmit.

SP62 Incoming Term Date is less than MSP Effective Date.

Purpose:

To ensure that MSP record effective dates are accurate.

Resolution:

Verify dates and resubmit.

SP66 MSP Effective Date is greater than the Effective Date on matching occurrence on Auxiliary file.

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit.

SP67 Incoming Term Date is less than posted Term Date for Provident.

Purpose:

To ensure that MSP record effective dates are accurate and correspond to Medicare eligibility.

Resolution:

Verify dates and resubmit.

SP72 Invalid Transaction attempted. A HUSP add transaction is received from a FI or carrier (non-COB Contractor) with a Validity Indicator other than I.

Purpose:

To ensure that correct information is recorded on the MSP Auxiliary record.

Resolution:

Correct Validity Indicator and resubmit.

SP73 Invalid Term Date/Delete Transaction attempted. An FI or carrier is attempting to change a Term Date on a MSP Auxiliary record with a I or Y Validity Indicator that is already terminated.

Purpose:

To ensure that MSP transactions are processed correctly.

Resolution:

Verify segment to delete, correct and resubmit if necessary.

SP74 Invalid, cannot update I record.

Purpose:

To ensure that MSP transactions are processed correctly.

Resolution:

Reject transaction.

SP75 Invalid transaction, no Medicare Part A benefits.

Purpose:

To ensure that Medicare pays only for claims for those who are entitled to Medicare benefits.

Resolution:

RD36	<p>Select Date not equal to a Select Date in any method selection iteration and not greater than the Select Date in the current iteration.</p>

Error Code	Explanation
------------	-------------

Purpose:

If the Override Code is blank, the Select Date must either:

- Match one of the existing select dates on the ESRD Auxiliary record;
or
- Be greater than the most recent select date on the ESRD Auxiliary record.

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD37	Override Code is a 1, 2, or 3, but the iteration requested does not exist.
------	--

Purpose:

To ensure that if the Override Code is 1, 2, or 3, an iteration with that value already exists.

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD38	Override Code is a 1, 2, or 3, and based upon the Exception Indicator and Select Date year, the Option Year is incorrect.
------	---

Purpose:

If the Override Code is 1, 2, or 3, and the Option Year has been entered:

- If the Exception Indicator is Y, the Option Year on the transaction must equal the Select Year on the transaction (or the Select Year on the ESRD Auxiliary Record if there is none on the transaction).
- If the Exception Indicator is N, the Option Year on the transaction must be 1 greater than the Select Year on the transaction (or the Select Year on the ESRD Auxiliary Record if there is none on the transaction).

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD39	Override Code is a 4, and the Select Date is not equal to a Select Date on any of the method selection iterations on the Beneficiary Master Record.
------	---

Error Code	Explanation
RD40	<p>Purpose:</p> <p>If Override Code is 4, Select Date must match one of the existing Select Dates on the ESRD Auxiliary Record.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>
	<p>If override code is 1, 2, 3, or 4, the ESRD auxiliary record must already contain method selection data.</p> <p>Purpose:</p> <p>To ensure Override Code corresponds to information on the ESRD Auxiliary Record.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>
	<p>If Override Code is 1, 2, or 3, and the Select Date is changed, the Select Date must not match the Select Date on any other existing iteration.</p> <p>Purpose:</p> <p>To ensure a change in the Select Date does not duplicate an existing iteration.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>

80.9 - Duplicate Checking Alert Error Codes

(Rev. 1, 10-01-03)

B-02-065, B-02-049, CWF EditAlert

<http://cms.csc.com/cwf/downloads/docs/pdfs/editalrt.pdf>

The following error codes refer to the duplicate claim Alert Codes. These codes will be included on the Trailer 06 returned on PAID claims. The alert is given so that the contractor can investigate if a duplicate claim exists and cancel the inappropriate claim if necessary.

To resolve these ALERT codes, the contractors investigate if a duplicate exists and cancel the duplicate claim and/or adjust the first claim and recover any overpayments if appropriate.

Duplicate Checking Alert Error Codes

Error Code	Explanation
761x	Duplicate claim processed with different ICN. ("x" equals 1, 2, 4, 5, or 6 only).
762x	Beneficiary receiving duplicate services from different providers.
763x	Beneficiary receiving duplicate services where only the revenue codes are different.
764x	Beneficiary receiving duplicate services where only the HCPCS codes are different.
765x	Beneficiary receiving duplicate services where only the charges are different.
766x	Beneficiary receiving duplicate services from different FIs.

Part B Alerts

7600	Duplicate claim being processed except for Document Control Number (DCN).
76x1	Duplicate billing(s) by the same provider.
76x2	Beneficiary receiving duplicate billing(s) from multiple providers.
76x3	Beneficiary receiving duplicate billings by the same provider but is not contractor specific.

Error Code	Explanation
DMEPOS	
DA01	A DMEPOS claim has capped rental, electrical wheelchair, or PEN pump items, and 60 days have passed since the last claim without an intervening Inpatient or SNF bill. Claims with modifiers "MS" and "KH" are excluded.
DA02	A claim for DMEPOS items with service dates that overlap an Inpatient admission are not allowed. This edit is bypassed for Therapeutic Shoe Insert claims, and select NOC code claims. Effective January 1, 2003, only the start date of claims for HCPCS codes A4253, A4255, A4256, and A4259 is considered for this edit (not the entire span of service dates). Beginning April 1, 2003, override of this edit is allowed.
DA03	Maintenance/service allowed only every 6 months. DMEPOS Claims for the maintenance or servicing (Modifier MS) of rental items and rented enteral pumps (HCPCS Code B9000 and B9002) that have met their cap are allowed only every 6 months following the 22nd month after delivery.
DA04	Maintenance/service allowed only every 3 months. DMEPOS claims for the maintenance or servicing (Modifier MS) for rented parenteral pumps (HCPCS Code B9004 and B9006) that have met their cap are allowed only every 3 months after the rental limit has been met.
DA05	For immunosuppressive drug claims duplicate billing by the same supplier detected. This edit is bypassed for Therapeutic Shoe insert claims, and claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.

80.10 - Duplicate Checking Reject Error Codes

(Rev. 1, 10-01-03)

B-02-065, B-02-049, CWF EditUtil

<http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>

The following error codes refer to the duplicate claim Reject Codes. **To resolve these error codes contractors verify and correct invalid data, then resubmit transaction or deny as duplicate claim.**

Duplicate Checking Reject Error Codes

Error Code	Explanation
5613	OP, HH Duplicate claim being processed with different ICN.
5700	Part B Possible split global surgical claim.
5701	Part B Non-Utilization Days, as indicated by Noncovered Occurrence Span Code, and Benefit Exhaust Dates, are less than the Non-Utilization field submitted on the claim. Complete global fee for the same surgery may already have been paid. Bypass Non-Payment Codes "B," "C," "E," "F," "G," "H," "J," "K," "N," "Q," "T," "U," "V," "W," or "Y."
5702	Part B Complete global fee for the same post-op procedure may already have been paid.
5703	Possible duplicate billing - billing by the same physician for the same surgery within 90 days.
5704	Possible duplicate billing - billing by the same physician for any procedure within 90 days.
5705	Possible split global surgical claim within 90 days.
BD01	Duplicate billing by the same supplier detected.
BD02	More than one supplier may be billing for the same items to the same beneficiary.
BD03	The same service provided by the same supplier using its NSC assigned number, and its Part B carrier assigned number. There is a DMEPOS claim on history for the same item which is being submitted on the Part B claim. The Provider HIC Number corresponding to the NSC assigned Supplier HIC Number on the DMEPOS claim matches the Provider HIC Number on the Part B claim.
DA05	Duplicate billing by the same supplier detected. This edit is bypassed for Therapeutic Shoe Insert claims and claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.

Error Code	Explanation
DA06	More than one supplier may be billing for the same items to the same beneficiary. This edit is bypassed for claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.
DA07	Same service provided by the same supplier using its Part B carrier HIC Number, and the NSC HIC Number of a business owned by the supplier. There is a Part B claim on history for the same supply that is being submitted on the DMEPOS claim. The NSC Supplier Number corresponding to the Provider Number on the Part B claim matches the NSC Supplier number on the DMEPOS claim. This edit is bypassed for claims with selected HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.
DA09	A claim for the purchase of an inexpensive and routinely purchased DMEPOS item with Service Dates that overlap an Inpatient admission is not allowed, unless the purchase date is equal to the Date of Admission, or Date of Discharge. Effective January 1, 2003, only the start date of claims for HCPCS code A4253 is considered for this edit (not the entire span of service dates). Beginning April 1, 2003, override of this edit is allowed.

80.11 - Certificate of Medical Necessity (CMN) Maintenance Transaction Error Codes

(Rev. 1, 10-01-03)

B-02-043, CWF EditMnts

<http://cms.csc.com/cwf/downloads/docs/pdfs/editmnts.pdf>

Certificate of Medical Necessity (CMN) Maintenance Transaction error codes indicate either a consistency error in the CMN Transaction Record (HUCM), or an error attempting to update the Host CMN Auxiliary file with an HUCM transaction. Consistency errors and file update errors can be encountered by the Hosts during Satellite Auxiliary file processing. Such transactions will be rejected with a "CM" Disposition Code in the CMN Transaction Reply Record. A trailer 08 with up to four error codes will always follow.

Consistency errors are numbered C001 through C069. General file update errors are numbered starting with the C100 code. Other update errors are numbered according to the type of CMN transaction being processed: C2xx for initial certifications, C3xx for revisions, and C4xx for re-certifications.

Listed below are the possible CMN consistency and file update errors. The consistency errors are documented with the requirements for the specific field, and a corrective action to be taken in case the error occurs. Each file update error includes a description of the error, and a corrective action. File update errors should always be investigated by querying the current information for the beneficiary at the CWF Host.

To resolve these error codes verify and correct invalid data according to the information specified under "purpose," then resubmit transaction.

CMN Maintenance Transaction Error Codes

Error Code	Explanation
C001	Invalid CMN transaction record type. Purpose: To ensure valid values: HUCM, HBCM, HICM

80.13 - Beneficiary Other Insurance Information (HUBO) Maintenance Transaction Error Codes

(Rev. 1, 10-01-03)

CWF EditMnts (<http://cms.csc.com/cwf/downloads/docs/pdfs/editmnts.pdf>)

HUBO (Beneficiary Other Insurance Information) Maintenance Transaction edit rejects are denoted by a value of "BO" in the disposition field on the Reply Record. A Trailer 08 containing up to four error codes will always follow. Listed below is the possible BOxx Maintenance Transaction error codes with a general description. **Each error must be corrected and the transaction resubmitted to CWF.**

The "50xx" series of Beneficiary edits that are returned on claim transaction response records that receive a Disposition "50," "51," etc. can also be returned on this maintenance transaction. The narrative description for these error codes is in the claim transaction edit sections.

HUBO Maintenance Transaction Error Codes

Error Code	Explanation
BO01	Beneficiary Health Insurance Number is missing, or invalid.
BO02	Beneficiary Surname is missing, or invalid.
BO03	Beneficiary Date of Birth is missing, or invalid.
BO04	Beneficiary Sex Code is invalid.
BO05	The Contractor Number is not equal to "11120."
BO06	The Date of Accretion is invalid.
BO07	The Deletion Date is invalid.
BO08	The Document Control Number is invalid.
BO09	The Action Type is missing, or invalid.
BO10	The Update Date is invalid.
BO11	The Insurance Coverage Type is missing, or invalid.
BO12	The Insurer Name or Address Info is invalid.
BO13	The Insurance Policy Number is invalid.

Error Code	Explanation
BO14	The Insurance Effective Date is invalid.
BO15	The Termination Date is invalid.
BO16	The Identifier Number is invalid.
BO17	The COBA Number is invalid.
BO18	The Plan ID Number is invalid.
BO19	The Other Insurer Number is invalid.
BO20	No match for update or delete found on BOI file.
BO21	Duplicate occurrence exists on the BOI file.

90 - CWF Adjustment Actions

(Rev. 1, 10-01-03)

A3-3816

The CWF performs only two types of internal adjustment actions: (1) correcting utilization on bills that are already posted and notifying the Satellite of that action using a Form CMS-L1001, and (2) canceling posted bills when CWF discovers an error in the posted utilization and notifying the Satellite of that action using a Form CMS-L1002. Section [90.1](#) describes the actions contractors are to take in response to these notices.

90.1- Notification of Internal Adjustment Action(s) Taken by CMS

(Rev. 1, 10-01-03)

A3-3816.1

Forms CMS-L1001 and CMS-L1002, Notification of Internal Adjustment Action(s) Taken by CMS, are issued when CWF identifies and internally adjusts specific provider bills that were accepted and now reflect incorrect utilization of available benefits. Carriers and FIs are notified of these adjustments via Form CMS-L1001 for debit/credit and Form CMS-L1002 for cancel only.

These forms are used by CWF when merging two active Beneficiary Master Records for some reason (e.g., cross-reference process) or processing an out-of-sequence inpatient hospital or SNF claim that causes two benefit periods to become one benefit period. If CWF can determine what the correct benefits are, the Form CMS-L1001 is used to correct the utilization on a previously processed claim. However, if CWF cannot determine what the correct benefits are, the previously processed claim is cancelled and a Form CMS-L1002 is used.

Upon receipt of a Form CMS-L1001, the contractor must correct internal files and either recover any overpayment or pay any underpayment. Do not resubmit the claim to CWF.

Upon receipt of a Form CMS-L1002, the contractor must reprocess the claim and resolve the disposition of the claim. Resubmit the corrected claim to CWF as an initial claim. If this action results in a need for adjustment to other claims, the contractor adjusts those claims and submits them to CWF as adjustments. If one or more of the "other" claims requiring adjustment is a result of a Form CMS-L1001, the new debit is the claim to be adjusted. The contractor uses Bill Type xxG to identify all adjustments made in response to a CWF notification. This includes those "other" claims to be adjusted as a result of a Forms CMS-L1001 or CMS-L1002.

Upon receipt of Forms CMS-L1001 and/or CMS-L1002, the contractor will also receive pertinent data to assist it in resolving any discrepancies. However, this information may not be sufficient by itself. If not, the contractor inquires into the CWF online system via the HIMR transaction for additional information.

Ensure that in-house records comply with the adjustment action. Also, the contractor notifies the provider. Beyond that, no further action is necessary.

NOTE: When scrambled utilization is detected and CMS can identify the appropriate beneficiaries, CWF initiates the necessary internal adjustment actions to remove utilization from the incorrect record. If a bill has not been posted for the correct record, the contractor submits one. The CWF cannot create the initial bill for the beneficiary's record.

100 - CWF Unsolicited Response

AB-01-111, AB-01-149, AB-02-002, AB-02-021, AB-02-023, AB-02-037, B-02-059, B-02-067, B-02-087, A-02-008, A-02-068, A-02-107

The CWF unsolicited response and automatic adjustment process is a means to retroactively adjust certain paid claims where subsequent claims or other subsequent actions are the first indicator that payment was inappropriate. Examples are:

- Home Health Agency (HHA)
- Medicare Quality Partnerships Demonstration (formerly referred to as "Medicare Centers of Excellence Demonstration")
- Medicare Provider Partnership Demonstration
- Skilled Nursing Facility (SNF)

The CWF sends an unsolicited response to carriers and/or FIs in response to these inappropriate claims. Edit codes usually are in the AB crossover categories.

When the carrier or FI receives an unsolicited response they are required to review each designated line item for possible recovery of payment. Claims subject to these unsolicited response edits are outlined in the following sections.

100.1 - Claims Related to an HH PPS Episode

AB-01-111, A-02-008

The CWF sets an error code for paid therapy and non-routine supply claims that contain line items for a date of service that is within a home health episode that is subject to HH PPS consolidated billing. These claims would have been processed prior to the posting of a claim for a HH PPS episode.

Upon receipt of a HH PPS claim, CWF will search paid claims history to determine whether any services subject to consolidated billing related to the HH PPS episode period were paid by any FI or carrier. CWF will compare the period between the HH claim from and through date (which represent the episode start date and the date of discharge) to the line item service dates of the claims on history. Services that must be consolidated in the HH PPS claim will be identified. CWF will generate an unsolicited response, with a trailer containing the identifying information regarding the claim subject to consolidated billing and a trailer containing line item specific information that identifies all the individual services on that claim that fall within the HH claim dates. The unsolicited response will have all necessary information to identify the claim, including document control number and health insurance claim number. CWF will electronically transmit this unsolicited response to the FI or carrier that originally processed the claim with consolidated services. These unsolicited responses will be included in the existing

unsolicited response file. The unsolicited responses in that file that are claims to be adjusted for consolidated billing will be identified with a unique transaction identifier and disposition code. The previously paid claim will not be canceled and will remain on CWF paid claims history, pending subsequent adjustment.

Upon receipt of the unsolicited response file, the FI shared system software will read the line item information in the new trailer for each claim and perform an automated adjustment to each claim. Carriers will perform a manual adjustment. The adjustment will line-item deny the services subject to consolidated billing. The adjusted claims will then be returned to CWF, so that the claim on CWF paid claims history is replaced with the adjusted record. FIs will return the claims with action code "3." Carriers and durable medical equipment regional carriers (DMERCs) will return the claims with entry code "5." Carriers must return both the covered and the denied services to CWF on the adjustment claim. FIs must return only the covered lines to CWF on the adjustment claim.

When CWF adjusts the claim on history, the deductible will be updated on the beneficiary's file and the corrected deductible information will be returned to the FI or carrier in Trailer 11.

Any monies due back to Medicare resulting from these denials will be recovered using current recovery procedures.

In the event that a denial is reversed upon appeal, based upon evidence that the home health claim information on CWF that generated the denial was inaccurate, an override procedure for the CWF denial is available to permit payment to be made.

In cases where all services on the claim are identified in CWF as subject to consolidated billing, the claim will be adjusted by the FI or carrier shared system to line item deny all the services on the claim. Carriers must return these fully denied claims to CWF, in order to reflect the denial actions in CWF paid claims history and to update the information in CMS' National Claims History file. Carrier and DMERC systems will use existing processes for the submission of fully denied claims. FIs should hold fully denied claims resulting from these changes until instructions are released.

10 - General Information

(Rev. 1, 10-01-03)

B3-4307, A3-3696.A, FY1998 BPRs on MSP

Fiscal intermediaries and carriers obtain information pertinent to the identification of MSP for each beneficiary via the CWF, MSP auxiliary file. The auxiliary file is associated with the beneficiary's master record within CWF.

The Coordination of Benefits (COBC) contractor completes MSP updates on a daily basis upon receipt of notice that another payer is primary to Medicare (e.g., an explanation of benefits, a beneficiary questionnaire, a notice from a third party payer, etc.). Every claim for a given beneficiary is validated against the same MSP data housed in a CWF, MSP auxiliary file, thus permitting uniform processing. Contractor claims data inconsistent with a CWF, MSP auxiliary file will cause rejects and/or error conditions. An MSP auxiliary record consistent with an identified MSP situation must be present before a payment is approved for an MSP claim. An MSP auxiliary record is established by an MSP maintenance transaction submitted to CWF. The claim must agree with the MSP auxiliary record that was established, or it will not process.

The COBC is the source for establishing new MSP records, with the exception of four situations described in §10.1, below. The COBC submits MSP maintenance transactions

on the basis of information obtained outside the claims process. Examples include IEQ, IRS/SSA/CMS Data Match, voluntary MSP data match agreements, attorney, beneficiary, provider information, and 411.25 Notices. The COBC also submits MSP maintenance transactions based on First Claim Development (FCD) and Trauma Code Development (TCD).

10.1 - Overview of CWF MSP Processing

(Rev. 1, 10-01-03)

B3-4307.B, A3-3696.B, PM-AB-00-107, AB-03-063

The CWF, MSP auxiliary file is updated with maintenance transactions from the Coordination of Benefits Contractor (COBC), except for the following situations:

1. If the contractor receives a phone call or correspondence from an attorney/other beneficiary representative, beneficiary, third party payer, provider, another insurer's Explanation of Benefits (EOB) or other source that establishes, exclusive of any further required development or investigation, that MSP no longer applies, it must add termination dates to MSP auxiliary records already established by the COB on CWF with a "Y" validity indicator where there is no discrepancy in the validity of the information contained on CWF. (See [§20.1.4](#))
2. If the intermediary or carrier receives a claim for secondary benefits and could, without further development (for example, the EOB from another insurer or third party payer contains all necessary data), add an MSP occurrence and pay the secondary claim, it submits a validity indicator of "I" to add any new MSP occurrences (only if no MSP record with the same MSP type already exists on CWF with an effective date within 100 days of the effective date of the incoming "I" record). It shall update CWF within 10 calendar days from completion of the evaluation. It cannot submit a new record with a "Y" or any record with an "N" validity indicator.
3. If the intermediary or carrier receives a claim for conditional payment, and the claim contains sufficient information to create an "I" record without further development, it must add the MSP occurrence using an "I" validity indicator (only if no MSP record with the same MSP type already exists on CWF with an effective date within 100 days of the effective date of the incoming "I" record). It shall update CWF within 10 calendar days from completion of the evaluation.

It shall transmit "I" records to CWF via the current HUSP transaction. The CWF will treat the "I" validity indicator the same as a "Y" validity indicator when processing claims. "I" records should only be submitted to CWF if no MSP record with the same MSP type already exists on CWF with an effective date within 100 days of the effective date of the incoming "I" record. "I" records submitted to CWF that fail these edit criteria will be rejected with an SP 20 error code. Receipt of an "I" validity indicator will result in a CWF trigger to the COBC. The

COBC will develop and confirm all "I" maintenance transactions established by the intermediary or carrier. If the COBC has not received information to the contrary within 100 calendar days, the COBC will automatically convert the "I" validity indicator to a "Y". If the COBC develops and determines there is no MSP, the COBC will delete the "I" record. An "I" record should never be established when the mandatory fields of information are not readily available to the intermediary or carrier on its claim attachment or unsolicited refund documentation. If the intermediary or carrier has the actual date that Medicare became secondary payer, it shall use that as the MSP effective date. If that information is not available, it shall use the Part A entitlement date as the MSP effective date. It may include a termination date when it initially establishes an "I" record. It may not add a termination date to an already established "I" record.

Prior to April 1, 2002, intermediaries and carriers post MSP records to CWF where beneficiaries were entitled to Part B benefits, but not entitled to Part A benefits. An MSP situation cannot exist when a beneficiary has GHP coverage (i.e., working aged, disability and ESRD) and is entitled to Part B only. CWF edits to prevent the posting of these MSP records to CWF when there is no Part A entitlement date. If a contractor submits an Electronic Correspondence Referral System (ECRS) transaction to the coordination of benefits (COBC) contractor to add a GHP MSP record where there is no Part A entitlement, reason code of 61 will be returned. Intermediaries and carriers should not submit an ECRS request to COBC to establish a GHP MSP record when there is no Part A entitlement. Contractors that attempt to establish an "I" record will receive a CWF error.

The CWF will continue to allow the posting of MSP records where there is no Part A entitlement when non-employer GHP situations exist, such as automobile, liability, and workers' compensation. Where a non-employer GHP situation exists, intermediaries and carriers should continue to submit ECRS transactions and establish "I" records, as necessary.

MSP Auxiliary maintenance transactions, for the four situations listed above, and claims for payment approval may be submitted to CWF in the same file. The CWF processes the MSP maintenance transactions before processing claims. This procedural flow is to assure processing for claim validation against the most current MSP data. If the MSP claim is accepted, the CWF host will return all MSP data on a beneficiary's auxiliary file to the submitting contractor via an "03" trailer. If the claim is rejected, the host will return only those MSP records that fall within the dates of service on the claim. A maximum of 17 MSP auxiliary records may be stored in CWF for each beneficiary. The validity indicator field of each CWF, MSP auxiliary record indicates confirmation that:

- Another insurer is responsible for payment ("Y" in the field); or
- Medicare is the primary payer ("N" in the field, IEQ record).

Medicare contractors may access the MSP auxiliary file through the online CWF file display utility Health Insurance Master Record (HIMR).

Intermediaries and carriers cannot delete MSP auxiliary records. They send such requests to the COB via the Electronic Correspondence Referral System (ECRS). (See Chapter 5, §§10.)

10.2 - Definition of MSP/CWF Terms

(Rev. 1, 10-01-03)

B3-4307.1, A3-3696.1, PM-AB-00-36, PM-A-00-107, PM-A-01-156 (CR1923), AB-03-046

Following is a list of terms and their definitions used in MSP/CWF processing.

MSP Auxiliary File - Up to 17 beneficiary MSP occurrences/records on the CWF database.

MSP Auxiliary Record - Record of beneficiary MSP information. One MSP record/occurrence within the beneficiary's MSP auxiliary file.

Occurrence - One MSP occurrence/record within the beneficiary's MSP auxiliary file.

MSP Effective Date - Effective date of MSP coverage.

MSP Termination Date - Termination date of MSP coverage.

Validity Indicator

- Y - Beneficiary has MSP coverage (there is a primary insurer for this period of time).
- N - No MSP coverage
- I - See [§10.1](#).

First Claim Development - First claim received by CWF and approved for payment and forwarded to COBC. Contractor receives "Z" indicator. COBC develops and updates CWF.

MSP Types - Reason for other coverage entitlement.

- A = Working Aged
- B = End stage renal disease (ESRD)
- D = Automobile/Liability
- E = Workers' Compensation (WC)
- F = Federal, Public Health

- G = Disabled
- H = Black Lung (BL)
- I = Veterans Affairs (VA)

NOTE: VA and other Federal payments are exclusions rather than MSP nonpayments.

Cost Avoided Claim - A claim returned without payment because CWF indicators indicate another insurer is primary to Medicare. (See Chapter 5, §60 for complete description.)

Transaction Type - Identifies type of maintenance record.

- 0 = Transaction type to add or change MSP data
- 1 = Transaction type to delete MSP data

Override Code - Code used to bypass CWF, MSP edit to allow primary Medicare payment. (See [§40.4](#) for a detailed explanation.)

20 - MSP Maintenance Transaction Record Processing

(Rev. 1, 10-01-03)

B3-4307.2, A3-3696.2, AB-00-107

The COBC shall submit an MSP maintenance transaction to establish an MSP auxiliary record within 10 calendar days of receipt of notice that another payer is primary to Medicare. The CWF applies extensive editing to the maintenance transaction. If an MSP maintenance transaction does not meet all edit criteria, error codes specific to the failed edit(s) will be returned via the CWF, MSP Maintenance Transaction Response. A complete record layout and field descriptions are contained in CWF Systems Documentation, Record Name: CWF, MSP Maintenance Transaction Response. For Out-of-Service Area transactions, the CWF OSA Maintenance Transaction Response is used. Its complete record layout and field descriptions are contained in CWF Systems Documentation, Record Name: CWF, MSP Maintenance Transaction Response. The consistency edit error codes and edit definitions are contained in CWF Systems Documentation Record Name: MSP Maintenance Transaction Error Codes. MSP transactions that pass all edits are applied to the CWF, MSP auxiliary file.

20.1 - Types of MSP Maintenance Transactions

(Rev. 1, 10-01-03)

B3-4307.2.A, A3-3696.2.A

The three types of maintenance transactions are add, change, and delete.

The COBC shall use MSP maintenance transaction type "O" (zero) for an add or a change transaction.

- The transaction is an add when no matching MSP occurrence - NO MATCHING MSP auxiliary record - is found for the beneficiary;
- The transaction is a change when a matching MSP occurrence is found.

After a successful MSP maintenance transaction processes through CWF, before and after images of the MSP auxiliary file occurrence are written to the MSP Audit File.

20.1.1 - MSP Add Transaction

(Rev. 1, 10-01-03)

B3-4307.2.A.1, A3-3696.2.A.1, AB-00-107

The two situations in which the "add" maintenance transaction is used are:

- There is no MSP auxiliary file record for a beneficiary. In this case, the "add" transaction creates an MSP auxiliary record containing the new MSP transaction and sets the MSP indicator on the beneficiary's master record; or
- There is an MSP auxiliary file record but no matching occurrence for the beneficiary. In this case, the "add" transaction adds the maintenance transaction as a new occurrence.

The following fields are mandatory for a validity indicator of "Y" or "I" (Another insurer is responsible for payment):

- HICN;
- MSP type (MSP code);
- Validity indicator;
- MSP effective date;
- Contractor identification number;
- Insurer name;

- Patient relationship; and
- Insurance type.

A "Y" or "I" record CANNOT be established without the insurer name.

NOTE: Although the insurer address cannot be MANDATORY, it should be provided whenever possible.

20.1.2 - MSP Change Transaction

(Rev. 1, 10-01-03)

B3-4307.2.A.2, A3-3696.2.A.2

An MSP change transaction occurs when the MSP type and effective date on the incoming maintenance transaction matches an existing MSP auxiliary occurrence.

A match occurs when the following items are the same:

For MSP types A, B, F, G, H, I (Working Aged, ESRD, Federal, Disabled, Black Lung, Veterans), matching means that the MSP effective date on the auxiliary occurrence and on the maintenance transaction are within 30 days, plus or minus.

For MSP types D and E (Auto/Liability and Worker's Compensation), matching means that the MSP effective date on the auxiliary occurrence and on the maintenance transaction match exactly.

- MSP type;
- MSP effective date;
- Insurance type; and
- Patient relationship.

When these items match, the balance of the record is overlaid.

No change transactions will be permitted to records established, except for the addition of a termination date.

20.1.3 - MSP Delete Transaction

(Rev. 1, 10-01-03)

B3-4307.2.A.3, A3-3696.2.A.3, PM-AB-01-25

The MSP maintenance type "1" is used to delete an MSP auxiliary occurrence. This transaction checks the beneficiary's master record for an MSP indicator. The COBC is

responsible for submitting this transaction. Intermediaries and carriers advise the COBC, via the Electronic Correspondence Referral System (ECRS), of the need to process an MSP maintenance type 1 transaction (delete).

20.1.4 - MSP Termination Date Transaction

(Rev. 1, 10-01-03)

Intermediaries and carriers add termination dates to MSP auxiliary records already established on CWF with a "Y" validity indicator, where there is no discrepancy in the validity of the information contained on CWF. They handle phone calls and written inquiries relating to simple terminations of existing MSP occurrences. Simple terminations are defined as terminations that can be made to a MSP auxiliary record without further development or investigation. They shall not transfer these calls or written inquiries to the COBC. In determining whether a call is to be handled by them or the COBC, the intermediary or carrier establishes the basis of the call. The following are examples when **not** to transfer a termination request to the COBC for further action.

EXAMPLE 1

Scenario: Mr. Doe is calling to report that his employer group health coverage has ended.

Intermediary/Carrier action: The intermediary/carrier checks for matching auxiliary record on CWF and terminates, if no conflicting data are presented. The intermediary/carrier does not transfer the call to the COBC.

EXAMPLE 2

Scenario: Mrs. X is calling to report that she has retired.

Intermediary/Carrier action: The intermediary/carrier checks for matching auxiliary record on CWF and terminates if no conflicting data are presented. The intermediary/carrier does not transfer the call to the COBC.

EXAMPLE 3

Scenario: The intermediary/carrier receives written correspondence that benefits are exhausted for an automobile case.

Intermediary/Carrier Action: The intermediary/carrier checks for matching auxiliary record on CWF. The lead contractor terminates in accordance with existing guidelines (e.g., accounting of monies spent). The non-lead contractor refers the case to the lead contractor based on pre-COB guidelines as outlined in the fiscal year (FY) 2001 MSP post pay Budget and Performance Requirements (BPRs). It does not forward the correspondence to the COBC.

EXAMPLE 4

Scenario: Union Hospital is calling to report that the MSP period contained on CWF for beneficiary X should be terminated.

Intermediary/Carrier action: The intermediary/carrier checks for matching auxiliary record on CWF and terminates if no conflict in evidence is presented. It does not transfer the call to the COBC.

COBC Role

The COBC adds termination dates to records not covered in A, above. In addition, the COBC updates MSP occurrences as a result of a request from an intermediary or carrier, or as a result of COB development and investigation. The following are examples of when to transfer a termination request to the COBC for further action.

EXAMPLE 1

Scenario: The termination date is greater than six months prior to the date of accretion (i.e., SP 57 error code) for all COBC numbers (e.g., 11100-11111, 33333, 77777, 88888, or 99999). (All COBC numbers follow the old data match 6-month termination rule.)

Intermediary/Carrier action: The intermediary/carrier sends a CWF assistance request to the COBC.

COBC action: The COBC checks for matching record on CWF and terminates. In cases where discrepant information exists, the COBC will investigate to determine the proper course of action.

EXAMPLE 2

Scenario: The intermediary/carrier receives information with regard to termination that is discrepant with the information contained on CWF.

Intermediary/Carrier action: The intermediary/carrier forwards to the COBC for investigation via ECRS.

COBC action: The COBC checks for matching record on CWF, investigates, and terminates if appropriate.

20.2 - Medicare Secondary Payer (MSP) Maintenance Transaction Record/Fiscal Intermediary (FI) and Carrier MSP Auxiliary File Update Responsibility

(Rev.)

A3-3800.1, B3-6004.2, AB-00-74, AB-02-107

Effective January 1, 2001, the capability to update the CWF Medicare Secondary Payer (MSP) auxiliary file is essentially a function of only the Coordination of Benefits Contractor (COBC). Carriers and Fiscal Intermediaries (FIs) will not have the capability to delete any MSP auxiliary file records, including those that a specific carrier or FI has established. If it is believed that a record should be changed or deleted, carriers and FIs use the COB Contractor Electronic Correspondence Referral System (discussed in the Medicare Secondary Payer (MSP) Manual, Chapters 4 and 5, CWF Assistance Request option, to notify the COB Contractor. Carriers and FIs process claims in accordance with existing claims processing guidelines.

There are only four instances in which carriers and FIs will retain the capability to update CWF. They are:

- A. A claim is received for secondary benefits and the contractor could, without further development (for example, the EOB from another insurer or third party payer contains all necessary data), add an MSP occurrence and pay the secondary claim. Carriers and FIs must use a new validity indicator of "I" to add any new MSP occurrences, and update CWF within 10 calendar days from completion of the evaluation. Carriers and FIs cannot submit a new record with a "Y" or any record with an "N" validity indicator.
- B. A claim is received for conditional payment, and the claim contains sufficient information to create an "I" record without further development. Carriers and FIs add the MSP occurrence using an "I" validity indicator. They must update CWF within 10 calendar days from completion of the evaluation.
- C. It is determined that an unsolicited refund is MSP based, and the referral document contains sufficient information to create an "I" record without further development. Carriers and FIs add the MSP occurrence using an "I" validity indicator. They update CWF within 10 calendar days from completion of the evaluation.
- D. A phone call or correspondence is received from an attorney or other beneficiary representative, beneficiary, third party payer, provider, another insurer's Explanation of Benefits (EOB) or other source that establishes, exclusive of any further required development or investigation that MSP no longer applies. Examples of such contacts include a telephone call from a beneficiary to report retirement or cessation of group health insurance or a letter that contains acceptable information that personal injury protection benefits have been

exhausted. Carriers and FIs add a termination date to the MSP auxiliary record using a "Y" validity indicator. They update CWF within the lesser of:

1. 10 calendar days from completion of the evaluation, or
2. 30 calendar days of the mailroom date stamped receipt/date of phone call, as applicable. Carriers and FIs do not have the capability to alter an existing termination date.

Carriers and FIs will transmit "I" records to CWF via the current HUSP transaction. The CWF will treat the "I" validity indicator the same as a "Y" validity indicator when processing claims. Receipt of an "I" validity indicator will result in a CWF trigger to the COB Contractor. The COB Contractor will develop and confirm all "I" maintenance transactions established by carriers and FIs. If the COB Contractor has not received information to the contrary within 100 calendar days, the COB Contractor will automatically convert the "I" validity indicator to a "Y." If the COB Contractor develops and determines there is no MSP, the COB Contractor will delete the "I" record. An "I" record should never be established when the mandatory fields of information are not readily available to a carrier or FI on a claim attachment or unsolicited refund documentation. If they have the actual date that Medicare became secondary payer, they use that as the MSP effective date. If that information is not available, they use the Part A entitlement date as the MSP effective date. Carriers and FIs may include a termination date when they initially establish an "I" record. They may not add a termination date to an already established "I" record.

Effective January 1, 2003, CWF accepts an "I" record only if no MSP record (validity indicator of either "I" or "Y;" open, closed or deleted status) with the same MSP type already exists on CWF with an effective date within 100 days of the effective date of the incoming "I" record. "I" records submitted to CWF that fail these edit criteria will reject with an SP 20 error code. The resolution for these cases is to transfer **all** available information to the COBC via the Electronic Correspondence Referral System (ECRS) CWF assistance request screen. It will be the responsibility of the COBC to reconcile the discrepancy and make any necessary modifications to the CWF auxiliary file record.

In addition, effective January 1, 2003, a refund or returned check is no longer a justification for submission of an "I" record. Since an "I" record does not contain the source (name and address) of the entity that returned the funds, COBC lacks the information necessary to develop to that source. Follow the examples below to determine which ECRS transaction to submit:

1. An MSP inquiry should be submitted when there is no existing or related MSP record on the CWF.
2. The CWF assistance request should be submitted when the information on the CWF is incorrect or the MSP record has been deleted.

3. If the check or voluntary refund will open and close the case/MSP issue, the carrier or FI should submit an MSP inquiry. They should refer to ECRS 5.0 manual for more information regarding closed cases.

The check should be deposited to unapplied cash until COBC makes an MSP determination.

30 - CWF, MSP Auxiliary File

(Rev. 1, 10-01-03)

B3-4307.2.B, A3-3696.2.B

A maximum number of 17 MSP auxiliary records may be stored in CWF for each beneficiary. The COBC is responsible for deletion of a record when the maximum storage is exceeded using the following priority:

- Oldest "deleted" (flagged for deletion) occurrence;
- Oldest "confirmed no" occurrence;
- Oldest termination date; or
- Oldest maintenance date for the MSP type to be added.

30.1 - Integrity of MSP Data

(Rev. 1, 10-01-03)

B3-4307.2.C, A3-3696.2.C

The CWF MSP data base integrity is totally dependent upon COBC input, supported by input by FIs and carriers to the COBC. The COBC is responsible for submitting to CWF MSP information it believes to be of the highest quality. It shall investigate information thoroughly before making changes to an existing CWF MSP auxiliary record.

Intermediaries and carriers shall update their internal MSP control file with the information received via the CWF "03" trailer response. If more current information is available that conflicts with that received from CWF, the contractor is responsible for advising the COBC, via ECRS, of the need to correct the CWF, MSP auxiliary record.

30.1.1 - Maintenance and Clean-Up of MSP Auxiliary files in CWF

(Rev. 1, 10-01-03)

1998 MSP BPRs for MSP

As a result of MSP litigation settlement agreements CMS negotiated, records were added to the MSP Auxiliary file under contractor number 33333 (litigation settlement). Under the settlement agreements, CMS was to receive records for only those Medicare beneficiaries for which Medicare was secondary payer per a settlement agreement. However, some data provided to CMS contain records for Medicare beneficiaries covered under a retirement group health plan or supplemental plan. These records were added to the CWF, MSP Auxiliary File. As these erroneous records are identified, beneficiaries, providers and the primary health plan have been notifying contractors that the records need to be corrected to again reflect Medicare as primary. All MSP Auxiliary File records, including these litigation records, need to be corrected and complete to maintain the integrity of the MSP Auxiliary File. As they become aware of an erroneous record, intermediaries and carriers are to advise the COBC via ECRS.

30.1.2 - MSP Effective Date Change Procedure

(Rev. 1, 10-01-03)

B3-4307.2.C.1, A3-3696.2.C.1

When the COBC becomes aware that an MSP effective date is incorrect, it shall perform the following functions:

- Delete the auxiliary record containing the incorrect MSP effective date using an MSP delete transaction; and
- Submit a CWF, MSP maintenance transaction with the correct MSP effective date to establish a new auxiliary record.

NOTE: When the beneficiary is entitled to both Parts A and B, the COBC shall use the Part A entitlement date, if the insurance effective date is prior to entitlement to Medicare.

30.1.3 - CWF/MSP Transaction Request for Contractor Assistance

(Rev. 1, 10-01-03)

B3-4307.2.C.2, A3-3696.2.C.2

Instances occur when the intermediary or carrier determines that the MSP effective date is not correct. When this happens, the contractor shall advise the COB, via ECRS, of the need to change the MSP effective date and shall provide the COBC with documentation to substantiate the change.

30.2 - MSP Termination Date Procedure

(Rev. 1, 10-01-03)

B3-4307.2.C.3, A3-3696.2.C.3

A - Future Termination Dates

The CWF allows future termination dates up to six months for all MSP types, except ESRD. For ESRD, CWF uses the following criteria:

- MSP effective date prior to February 1, 1990, allows for termination date up to 12 months after the effective date;
- MSP effective date February 1, 1990, through February 29, 1996, allows for termination date up to 18 months after the effective date; or
- MSP effective date March 1, 1996, and later allows for termination date up to 30 months after the effective date.

B - Add Termination Dates

A termination date can only be added (not changed) to MSP auxiliary records established by contractor number "77777" or by contractor numbers "11101-11106."

C - Termination for "Y" Validity Indicator

A CWF MSP auxiliary record with a "Y" validity indicator establishes Medicare as the secondary payer. When posting a termination date to this record the "Y" validity indicator should not be changed. The record indicates a valid MSP occurrence and all future claims submitted will edit against the time frame posted. The contractor shall advise the COBC via ECRS when MSP no longer applies, and the COBC shall enter the termination date.

30.3 - MSP Auxiliary File Errors

(Rev. 1, 10-01-03)

CWF Documentation 7/2002 Release, PM AB-98-16, A3-3810

Maintenance transactions to the MSP Auxiliary file reject invalid data with errors identified by a value of "SP" in the disposition field on the Reply Record. A trailer of "08" containing up to four error codes, will always follow. See CWF documentation at <http://cms.csc.com/cwf/> for more specific information. Listed below are the possible MSP Maintenance Transaction error codes with a general description.

Error Code	Definition	Valid Values
SP11	Invalid MSP transaction record type	"HUSP", "HISP" or "HBSP"
SP12	Invalid HIC Number	Valid HIC Number
SP13	Invalid Beneficiary Surname	Valid Surname
SP14	Invalid Beneficiary First Name Initial	Valid Initial
SP15	Invalid Beneficiary Date of Birth	Valid Date of Birth
SP16	Invalid Beneficiary Sex Code	0=Unknown, 1=Male, 2=Female
SP17	Invalid Contractor Number	CMS Assigned Contractor Number
SP18	Invalid Document Control Number	Valid Document Control Number
SP19	Invalid Maintenance Transaction Type	0=Add/Change MSP Data transaction, 1=Delete MSP Data Transaction
SP20	Invalid Validity Indicator	Y= Beneficiary has MSP Coverage, I= Entered by intermediary/ carrier - Medicare Secondary-COB investigate, N -No MSP coverage
SP21	Invalid MSP Code	A=Working Aged B=ESRD C= Conditional Payment D= No Fault E= Workers' Compensation F= Federal G= Disabled H= Black Lung I= Veteran's Administration L= Liability

Error Code	Definition	Valid Values

SP58	Invalid Insurer type, MSP code, and validity indicator combination.	If MSP code is equal to "A" or "B" or "G" and validity indicator is equal to "I" or "Y" then insurer type must not be equal to spaces.

SP59	Invalid Insurer type, and validity indicator combination	If validity indicator is equal to "N" then insurer type must be equal to spaces.
SP60	Other Insurer type for same period on file (Non "J" or "K") Insurer type on incoming maintenance record is equal to "J" or "K" and Insurer type on matching aux record is not equal to "J" or "K".	Edit applies only to MSP codes: A - Working Aged, B - ESRD EGHP, G - Disability EGHP
SP61	Other Insurer type for same period on file ("J" or "K") Insurer type on incoming maintenance record is not equal to "J" or "K" and Insurer type on matching aux record is equal to "J" or "K".	Edit applies only to MSP codes: A - Working Aged, B - ESRD EGHP, G - Disability EGHP
SP62	Incoming term date is less than MSP Effective date.	
SP66	MSP Effective date is greater than the Effective date on matching occurrence on auxiliary file	
SP67	Incoming term date is less than posted term date for Provident	
SP72	Invalid Transaction attempted	A HUSP add transaction is received from a FI or Carrier (non-COBC) with a validity indicator other than "I".
SP73	Invalid Term Date/Delete Transaction	A FI or Carrier attempts to change a Term Date on a MSP Auxiliary record with a "I" or "Y" Validity Indicator that is already terminated, or trying to add Term Date to "N" record.
SP74	Invalid cannot update "I" record.	A FI or Carrier submits a HUSP transaction to update/change an "I" record or to add an "I" record and a match MSP Auxiliary occurrence exists with a "I" validity indicator.
SP75	Invalid transaction, no Medicare Part A benefits	A HUSP transaction to add a record with a Validity Indicator equal to "I" (from an FI/carrier) or "Y" (from

		COBC) with an MSP Type equal to "A", "B", "C" or "G" and the effective date of the transaction is not within a current or prior Medicare Part A entitlement period, or the transaction is greater than the termination date of a Medicare entitlement period.

30.3.3 - Other Effective Date and Termination Date Coverage Edits

(Rev. 1, 10-01-03)

If MSP Code:	Effective Date Must Be Greater Than
A - Working Aged	January 1, 1983 (830101)
A - Working Aged	Calculated Date beneficiary turned 65 (first day of month).
B - ESRD	October 1, 1981
D - No Fault	December 1, 1980
E - Workers' Compensation	July 1, 1966
F - Federal/Public Health	July 1, 1966
H - Black Lung	July 1, 1973
I - Veterans' Administration	July 1, 1966
G - Disabled (43)	January 1, 1987
G - Disabled	Prior to the first day of the month the Beneficiary turns 65.
L - Liability	December 1, 1980

Other Termination date coverage edits are:

- If contractor number is that of the IRS/SSA/CMS data match project ("77777"), the term date may be equal to or greater than the effective date,
- Cannot be greater than the current date plus six months, except for MSP code = B, and
- Cannot be greater than the first day the beneficiary turned 65 if the MSP code is B or G.

30.3.4 - Employee Information Data Code

(Rev. 1, 10-01-03)

Employee Information Data Code	Valid Values
P	Patient
S	Spouse
M	Mother
F	Father

30.4 - Automatic Notice of Change to MSP Auxiliary File

(Rev. 1, 10-01-03)

PM - AB-02-089 (CR1529)

Historically, intermediaries and carriers have become aware of changes to the Common Working File (CWF) MSP auxiliary file in one of two ways: (1) receipt of an 01 response confirming acceptance of an MSP change they initiated; and (2) receipt of an MSP trailer with a CWF reply to a claim sent to CWF for payment. This process will continue.

However, in addition, beginning July 1, 2002, CWF sends a new MSP transaction to all intermediaries and carriers **of record** when an MSP auxiliary record is created or changed for any beneficiary. The transaction contains the same data fields in the same format as the MSP trailer but, since it is not initiated by submission of a current claim, it is not returned as part of a claim reply. It is sent by CWF as a separate transaction identified by transaction type "HOSS." Intermediaries and carriers of record for a beneficiary are those for whom CWF has previously processed a claim to payment. CWF maintains an ongoing record by beneficiary of contractors for whom claims have been accepted. The CWF begun building this record based on claims authorized for payment on or after July 1, 2002.

Standard claims processing and contractor systems must recognize this transaction and use it the same as the MSP trailer. This includes initiating claims history searches and commencing any necessary recovery actions.

40 - MSP Claim Processing

(Rev. 1, 10-01-03)

B3-4307.3, A3-3696.3

The CWF performs consistency edit checks on claims submitted to it. Refer to CWF Systems Documentation for the complete record layout and field descriptions. Record names are:

- CWF Part B Claim Record, and
- CWF Inpatient/SNF Bill Record.

The MSP claims failing the consistency edits receive a reject with the appropriate disposition code, reject code, and MSP trailer data. Refer to CWF Systems Documentation, Record Name: CWF, MSP Basic Reply Trailer Data for the complete record layout and field descriptions. Claims passing the consistency edit process are reviewed for utilization compliance. Claims rejected by the utilization review process are rejected with the appropriate disposition code, reject code and MSP trailer data.

40.1 - CWF, MSP Claim Validation

(Rev. 1, 10-01-03)

B3-4307.3.A, A3-3696.3.A

There are four conditions that may occur when a contractor validates claims against the CWF, MSP auxiliary file:

- MSP is indicated on the claim and there is matching data on the CWF, MSP auxiliary record. The claim is accepted and all CWF, MSP auxiliary occurrences are returned,
- MSP is indicated on the claim and there is no matching data on an MSP auxiliary record. The claim is rejected and all CWF, MSP occurrences that apply are returned. Section [40.8](#) describes the CWF, MSP Utilization Error Codes, and the appropriate resolution for those codes,
- MSP is not indicated on the claim and the MSP auxiliary file has an occurrence that indicates there is MSP involvement for the time period affected. The claim is rejected and all occurrences that apply are returned, and
- MSP is not indicated on the claim and there are no matching occurrences on the CWF, MSP auxiliary file that indicate MSP involvement. The claim is accepted for payment.

NOTE: An occurrence applies if the claim service dates are equal to, or greater than, the effective date of the occurrence and less than, or equal to, the termination date of that occurrence, if there is a termination date.

40.2 - CWF Claim Matching Criteria Against MSP Records

(Rev. 1, 10-01-03)

B3-4307.3.B, A3-3696.3.B

The matching criteria between the claim and the MSP auxiliary occurrence is as follows:

- MSP types are equal;
- MSP auxiliary record validity indicator equals "Y";
- Overlapping dates of service on the claim (claim service dates after MSP effective date and before MSP termination date, if present); and
- No MSP override code used when submitting the claim.

40.3 - Conditional Payment

(Rev. 1, 10-01-03)

B3-4307.3C, A3-3696.3C, CWF Documentation 6-02

To make a conditional payment, FIs and carriers indicate conditional payment on the CWF, Part B Claim by placing a "C" in the "MSP code" field (field 97 of the CWF Part B Claim record.). Intermediaries indicate conditional payment on the CWF Inpatient/SNF Bill by placing zeros (0) in the "value amount" field (position 77b) along with the appropriate "value code". An MSP auxiliary record for the beneficiary with a "Y" validity indicator must be present. The CWF will reject the claim with error code 6805 when a claim for conditional payment is submitted and there is no matching MSP auxiliary record present.

40.4 - Override Codes

(Rev. 1, 10-01-03)

B3-4307.3.D, A3-3696.3.D

The CWF will accept MSP override codes. FIs and carriers must place the appropriate override code in the "MSP code" field (field 97) of the CWF Part B Claim record. Intermediaries must place the appropriate override code in the CWF (Inpatient/SNF Bill or Outpatient/Home Health/Hospice), "Special Action Code/Override Code, field 90". Override codes must be used only as described below.

The CWF employs the following matching criteria for override codes "M" and "N":

- Dates of service on the claim fall within the effective and termination dates on auxiliary record; and
- Validity indicator is equal to "Y".

The correct use of override codes is as follows:

A - Override code "M" is used where EGHP, LGHP and ESRD services are involved and the service provided is either:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

B - Override code "N" is used where non-EGHP (auto medical, no-fault, liability, Black Lung, Veterans Affairs and workers' compensation) services are involved and the service is either:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

Contractors receive error code 6806 when the MSP override code equals "M" or "N" and no MSP record is found with overlapping dates of service. The "Y" and "Z" override codes valid prior to the conversion of MSP data into CWF on December 10, 1990, are obsolete.

40.5 - MSP Cost Avoided Claims

(Rev. 1, 10-01-03)

B3-4307.4, A3-3696.4, AB-98-16

Contractors shall follow the instructions cited in Chapter 5, §§50, for counting savings on MSP cost avoided claims.

They shall submit **ALL** MSP cost avoided claims to CWF.

Payment/Denial codes are used to identify the reason a claim was denied. Specific codes for MSP are listed and defined in [§10.2](#) under the MSP/COB/Contractor Number chart in that section. Carriers submit the appropriate code to CWF in the "HUBC" claim record in field 63 "Payment/Denial Code" for line item denials. They complete the appropriate code for full claim denials in the "HUBC" claim record, field 16 "Payment/Denial". Intermediaries submit the appropriate code in the HUIP CWF record field 58 "Nonpayment" code for inpatient hospital and SNF claim denials. They submit the appropriate code in field 59 "No Pay Code" of the CWF record for the specific type of claim identified in the chart below.

PAYMENT/DENIAL CODE FIELDS IN CWF CLAIM RECORD

Contractor	Type of Claim	CWF Record	Field
Carrier	Full Claim Denial	HUBC	16 Payment/Denial
Carrier	Full Line Item Denial	HUBC	63 Payment/Denial Code
Intermediary	Inpatient hospital and inpatient SNF Denial	HUIP	58 Nonpayment Code
Intermediary	Outpatient	HUOP	59 No Pay Code
RHHI	Home Health	HUHH	59 No Pay Code
RHHI	Hospice	HUHC	59 No Pay Code

Contractor number 88888 identifies Voluntary Data Sharing Agreements with other insurers. The denial indicator of "Q" for cost avoided claims is to be used for claims that match against the 88888 contractor auxiliary record. If the denial indicator is incorrect, the CWF software will correct the denial indicator based on the matching MSP auxiliary record and send the correct value back to the contractor on the response record header.

- It is not necessary for an MSP auxiliary record to be present in order to post MSP cost avoided savings. If one is present, the FI or carrier uses the "X" or "Y" override code as appropriate.

40.6 - Online Inquiry to MSP Data

(Rev. 1, 10-01-03)

B3-4307.7, A3-3696.7

The MSP data may be viewed online in CWF via the HIMR access. The user enters the transaction HIMR, which displays the HIMR Main Menu, and enters the MSPA selection. (A complete record layout and field descriptions can be found in the CWF Systems Documentation at <http://cms.csc.com/cwf/>, Record Name: MSP Auxiliary File and MSP Audit History File.)

A user can **view a selected CWF, MSP auxiliary record** by following the steps outlined below:

A - Enter the HICN and MSP record type.

If the data entered is invalid, an error message is displayed with the field in error highlighted. If the data entries are valid, a search is done of the beneficiary master file for an MSP indicator. The search of the master file will show one of the following:

- The MSP indicator on the beneficiary file is not set. In this case the message "MSP not indicated" is displayed;
- No record is found. In this case, a message "MSP auxiliary file not found" is displayed; or
- MSP is indicated. In this case, the MSP auxiliary file is read and the screen will display an MSP Record.

A successful reading of the MSP file, as noted in the third bullet above, will display an MSP occurrence summary screen that includes:

- Summary selection number;
- MSP code;
- MSP code description;
- Validity indicator;
- Delete indicator;
- Effective date; and
- Termination date, if applicable.

B - Enter the summary selection number on the MSP occurrence summary screen.

This results in a display of the MSP occurrence detail screen for the selected MSP occurrence. The MSP occurrence detail screen is a full display of the information on the MSP auxiliary file for the particular MSP occurrence.

40.7 - MSP Purge Process

(Rev. 1, 10-01-03)

B3-4307.8, A3-3696.8

The CWF process includes an MSP purge process. The CMS will determine when the purge process will be employed. The criteria for deletion of MSP data from the MSP auxiliary file will be a predetermined number of years from the following dates:

- Date of death;
- Termination date and last maintenance date; or
- Last maintenance date and delete indicator equal to "D".

The MSP purge criteria will be parameter driven. All occurrences of MSP data for a beneficiary will be copied to the MSP history audit file, and the MSP indicator on the beneficiary file will be disengaged (turned off) if no other occurrences are present on the file.

A Summary report, by originating contractor identification number, will contain the total number of MSP records affected by the purge and the total of each type of MSP occurrence deleted from the MSP auxiliary file.

40.8 - MSP Utilization Edits and Resolution for Claims Submitted to CWF

(Rev. 1, 10-01-03)

B3-4307.8, A3-3696.8 Exhibit 2, AB-00-36

Error codes 6801 - 6806 do not apply to first claim development.

Error Code	Error Description	Resolution
6801	MSP indicated on claim - no MSP auxiliary record exists on CWF data base.	Prepare an "I" MSP maintenance transaction and resubmit claim to CWF. See §10.1 for criteria to submit "I". If "I" criteria is not met, submit an MSP inquiry via ECRS.
6802	MSP indicated on claim - no match on MSP auxiliary file.	(1) Analyze CWF auxiliary file. (2) Create a new "I" MSP auxiliary record, or if "I" record criteria is not met, submit an MSP inquiry or CWF

Error Code	Error Description	Resolution
		assistance request via ECRS; and (3) Resubmit claim.
NOTE: Match criteria: MSP types are equal, validity indicator equals "Y", dates of service are within MSP period and NO override code is indicated on claim.		
6803	MSP auxiliary record exists - no MSP indicated on claim but dates of service match.	<p>(1) Deny claim. Advise beneficiary/provider: "Resubmit claim with other payer's Explanation of Benefits for possible secondary payment. If other insurance has terminated, resubmit with documentation showing termination dates of other insurance." If you have documentation showing termination of the insurance coverage indicated in the CWF, MSP occurrence, process as follows:</p> <p>(2) Post a termination date; or.</p> <p>(3) Resubmit claim as MSP.</p> <p>If the termination date is incorrect, submit a CWF assistance request via ECRS.</p>
6805	MSP conditional payment claim and matching MSP record with "Y" validity indicator not found.	<p>(1) Create an "I" MSP Auxiliary Record when it fits the criteria for adding an "I" record.</p> <p>(2) Submit MSP inquiry or CWF assistance request via ECRS.</p> <p>(3) Resubmit claim.</p>
6806	MSP override code equals "M" or "N" and no MSP record found with overlapping dates of service.	If record was deleted in error, request CWF assistance request. Do not recreate record with "I" validity indicator.
6810	Part A claim was processed and only a Part B (Insurer type = "K") matching record was found.	

Error

Error Code	Error Description	Resolution
6811	Part B claim was processed and only a Part A (Insurer type = "J") matching record was found.	

See discussion in [§40.4](#) above for proper use of override codes.

40.9 - CWF MSP Reject for A Beneficiary Entitled to Medicare Part B Only and A GHP

(Rev. 1, 10-01-03)

AB-03-063

An MSP situation cannot exist when a beneficiary has GHP coverage (i.e., working aged, disability and ESRD) and is entitled to Part B only. CWF will edit to prevent the posting of these MSP records to CWF when there is no Part A entitlement date. Currently, if a contractor submits an Electronic Correspondence Referral System (ECRS) transaction to the coordination of benefits (COB) contractor to add a GHP MSP record where there is no Part A entitlement, the contractor will receive a reason code of 61. The COB contractor's system cannot delete these types of records once the records are posted to CWF by a contractor. Beginning April 2002 CWF will create a utility to retroactively delete all MSP GHP records where there is no Part A entitlement.

Contractors should not submit an ECRS request to COB to establish a GHP MSP record when there is no Part A entitlement. Contractors that attempt to establish an "I" record will receive a CWF error.

The CWF will continue to allow the posting of MSP records where there is no Part A entitlement when non-employer GHP situations exists, such as automobile, liability, and workers' compensation. Where a non-employer GHP situation exists, the contractor should continue to submit ECRS transactions and establish "I" records, as necessary.

50 - Special CWF Processes

(Rev. 1, 10-01-03)

50.1 - Extension of MSP-ESRD Coordination Period

(Rev. 1, 10-01-03)

AB-97-14

Section 4631(b) of the Balanced Budget Act (BBA) of 1997 permanently extends the coordination period to 30 months for any individual whose coordination period began on or after March 1, 1996. Therefore, individuals who have not completed an 18-month

coordination period by July 31, 1997, will have a 30-month coordination period under the new law. The Common Working File (CWF) will deny claims for primary payment that are submitted for applicable individuals during the 30-month coordination period. This provision does not apply to individuals who would reach the 18-month point on or before July 31, 1997. These individuals would continue to have an 18-month coordination period.

A one-time utility program was executed in CWF to extend the ESRD coordination period for applicable individuals (those records with a Medicare Secondary Payer (MSP) code of "B" and a coordination period termination date of August 1997, or later) to 30 months. This was done by adding 12 months to all coordination periods with a termination date on or after August 1997. All applicable records were changed by September 1, 1997. Any open records (those which do not have a termination date) remained open until they closed using the existing mechanisms, but following the time guidelines outlined above. That is, any ESRD, MSP termination dates, which were added to CWF where the coordination period ended in August 1997 or later, now reflect the new 30-month period. Claims erroneously submitted for primary payment are rejected with CWF Utilization Error Code 6803.

50.2 - Sending of HUSC Files From CWF to Recovery Management and Account Systems (ReMAS)

(Rev. 1, 10-01-03)

PM-AB-02-017

A - Background of ReMas

Recovery Management and Account Systems (ReMAS) is a system that will identify mistaken Medicare primary payments in the case where Medicare should have paid secondary. In some instances, other insurance is available to pay for furnished services and Medicare payment is secondary to the payment obligation of the other insurance. Medicare does not generally make a primary payment if it should be the secondary payer, and it is aware that the insurance obligated to pay before Medicare is available. If Medicare makes a mistaken primary payment in such a situation, Medicare pursues recovery of the mistaken primary payment from an appropriate party. ReMAS will identify these mistaken payments so that recovery can be initiated from the party that should have paid primary. ReMAS replaces several contractor systems, as well as CMS systems in order to integrate the identification of mistaken MSP overpayments into a centralized database. ReMAS depends on an interface with CWF to receive notification of beneficiaries that had insurance coverage primary to Medicare. A separate, future instruction will explain how and when Medicare Contractors will use ReMAS.

B - Purpose, Frequency and File Description of CWF Interface with ReMAS

In order for ReMAS to receive notice of MSP situations, it will receive HUSC records from each CWF host on a daily basis. All CWF hosts will transmit HUSC records to

ReMAS for every HUSP record that is accepted in CWF. The CWF will send these records to ReMAS using contractor number 11200. All files from each CWF host are sent to the CMS Data Center through the CMS mainframe telecommunication information system (MTIS) process, to a specific data set name that will be provided.

C - Data Feeds

Initial Data Feed: ReMAS will provide an Initial Data Feed Date to CWF. CWF will send any MSP occurrence (MSP Type Values "A"= Working aged; "B"= ESRD; "D"= Automobile Insurance, No-Fault; "E"= Workers' Compensation; "G"= Disabled; "L"= Liability) that was added to CWF since the Initial Data Feed Date.

Ongoing Data Feeds: CWF will send any valid new MSP occurrence (MSP Type A, B, D, E, G, or L). CWF will send any updates to any valid MSP occurrence (MSP Type A, B, D, E, G, or L). CWF will send any deletes of any valid MSP occurrences (MSP Type A, B, D, E, G, or L).

60 – Use of Inter-Contractor Notices (ICNs) and CWF for Development Conditional Payment Amount

(Rev. 1, 10-01-03)

AB-03-108

As a result of the implementation of the Coordination of Benefits Contractor (COBC), lead recovery contractor identification and notification will be done by the COBC; the lead recovery contractor continues to be responsible for the identification and recovery of Medicare's MSP claim. Medicare manual sections cited in the Budget Performance Requirements (BPRs) address the responsibilities of the lead contractor.

The CMS has designated fiscal intermediaries as the leads for all new liability, no-fault, workers' compensation, and FTCA recoveries. Carriers retain the lead for any pre-existing pending cases for which they were the lead recovery contractor prior to the implementation of the COBC.

Prior instructions called for lead recovery contractors to issue ICN requests to all contractors having paid claims related to an identified liability, no-fault, workers' compensation, or FTCA case. The ICN requests are for purposes of developing the conditional payment amount associated with any claims paid by another contractor. Effective October 1, 2002, contractors began to utilize CWF to identify related conditional payments in certain situations.

60.1 – General Rules for the Use of ICNs vs CWF for Development of Medicare’s Conditional Payment Amount

(Rev. 1, 10-01-03)

When the date of the accident/injury/illness/incident is within 18 months of the contractor’s notification of lead recovery contractor status via COBC, contractors must develop the total conditional payment amount through the use of CWF, rather than ICNs. Where the initial conditional payment amount was obtained through the use of ICNs; but the notice of settlement, judgment, or award is less than 22 months from the date the initial conditional payment amount was furnished, the lead recovery contractor will obtain updated amounts through the use of CWF. Where workload permits, the lead recovery contractor should update the conditional payment amounts near the end of the expiration of the 22-month period in order to avoid the need for an ICN at the time of settlement, judgment, or award. When obtaining claims information from the CWF, the lead recovery contractor must retrieve archived claims via the appropriate command (i.e., MSPA, MSPB, INPL, OUTL, etc.). If the data is purged and the lead recovery contractor has the ability to retrieve it, they must do so. Contractors have been furnished with OSCAR access (for institutional provider information), the UPIN directory disc (for physician, nurse practitioner, clinical nurse specialists, and physician assistant information), and with a process to gain access to the National Supplier Clearinghouse (NSC) (for DMEPOS supplier information).

Where the date of accident/injury/illness/incident in comparison to the lead notification via COBC is greater than 18 months, the lead recovery contractor will send ICNs to the non-lead contractors. Non-leads must respond to the ICN request within 45 days from receipt, except in response to a notice of settlement, judgment, or award. Non-lead contractors have 30 days to respond to a notice of settlement, judgment, or award ICN if they had no prior ICN request; and 15 days to respond if the ICN request is a request to update the conditional payment amount previously received. Where the time span between the development of the initial conditional payment amount and notification of a settlement, judgment, or award exceeds 22 months, the lead recovery contractor may develop the updated conditional payment amount by ICN.

All contractors should be aware that because product liability situations are often unknown for some time after the product at issue is first used, many product liability situations are likely to exceed the 18-month time frame for initial notification and will require the use of ICN requests to develop Medicare’s conditional payment amounts.

NOTE: The retention period for CWF claims data has been increased to a minimum of 24 months. This change, in conjunction with the rules stated above, will allow lead recovery contractors to deal with occasional backlog situations. Even where the initial notification of an accident/injury/illness/incident is near the end of the 18-month period, contractors will have adequate time to develop the conditional payment amount without the need for ICNs.

A – ICN Requests By The Lead Recovery Contractor When the 18-Month Period Has Not Expired

Non-lead contractors do not need to respond to ICN requests sent within the 18-month period. They should annotate such ICNs with the reason the ICN is not being processed and immediately return the ICN to the lead contractor (to ensure that the lead contractor can obtain the information from CWF while it is still available). If a non-lead contractor experiences repeated problems with this issue from a particular lead contractor, they should notify their regional office (RO).

ICN Backlog Issues

If an ICN backlog (for issuing and/or replying to ICN requests) develops, contractors are required to report the situation to their RO MSP Coordinator immediately, provide a plan for elimination of the backlog, and obtain RO approval of the plan. The plan for eliminating an ICN backlog must involve simultaneously working both new and old lead assignments in order to minimize the number of ICNs that must be issued. Non-lead contractors must respond to ICN requests where the 24-month CWF minimum period for claims data retention has expired even if they believe that the issuing contractor should have been able to obtain the information from the CWF before the 24-month period expired. If a receiving contractor is concerned about repeated situations with a particular contractor, it must notify its RO. The RO will ascertain whether the other contractor at issue is in the midst of eliminating a backlog.

ICN Request Content Issues

ICN requests must always provide sufficient information for the non-lead contractor to readily identify if an incoming ICN is an initial request or a follow-up request and whether or not a settlement, judgment, or award has occurred (including the date). ICN requests should also be clearly marked to show that no CWF record exists, in those limited circumstances where a contractor has been directed not to establish a CWF record.

Contractors are reminded that ICN requests must include a narrative description of the accident/injury/illness/incident and/or related diagnosis codes as well as the date of the accident/injury/illness/incident.

ICN Responses

Non-lead contractors responding to ICN requests are reminded that ICN responses must specifically annotate/identify all related claims; the non-lead contractor may not simply furnish a “history dump” without further identification of those claims which are related to the accident/injury/illness/incident. Non lead contractors are reminded that they must also furnish appropriate claims detail; they may not simply furnish a dollar total for related claims.

Reminder Regarding Termination Updates to the CWF

When the lead recovery contractor is notified, by writing or via telephone conversation of a settlement, judgment, or award, the date of that settlement, judgment or award should be entered in the termination field of the CWF immediately. The lead recovery contractor must **not** delay entry of the termination date until the recovery demand letter is issued or until the debt is repaid and the case is closed. Failure to perform a timely update puts the Medicare trust funds at risk.

Reminder Regarding Savings Information to Non-Lead Contractors

The lead recovery contractor continues to be responsible for reporting appropriate savings amounts to non-lead contractors even where conditional payment amounts were developed using CWF. The lead recovery contractor must furnish sufficient detail with this notification for the non-lead to report appropriate savings and process any necessary claim adjustments. If there is a beneficiary specific recovery in a situation where CMS has determined that a CWF MSP record is not appropriate, all savings should be reported by the lead contractor without any claim adjustments.
